OJSC “VolgaTelecom” shares are allowed for circulation by two organizers of trading at securities market:

- Non-commercial partnership “Stock exchange “Russian trading system” (NCP Stock exchange “RTS”);
- Closed Joint Stock Company “Moscow Interbank Currency Exchange” (CJSC “MICEX”).

NCP Stock exchange “RTS”- the organizer of trading is selected for calculation of weighted average price of a share; the issuer’s shares have been circulating there since December 1996.

Methods of defining market capitalization:

➤ Market capitalization as of the date of each fiscal year accomplishment is calculated as the product of shares quantity of the corresponding category (type) by weighted average price of a share of this category (type). Weighted average price of shares is calculated by 10 largest transactions made via the organizer of trading at the securities market in the last month of each accomplished fiscal year.

In case, if during the last month of the accomplished fiscal year there were less than 10 transactions made at the securities market, then the weighted average price of a share is calculated by 10 largest transactions made via the organizer of trading at the securities market during 3 last months of each accomplished fiscal year for which the information on OJSC “VolgaTelecom” market capitalization is indicated.

In case, if during the last 3 months of each accomplished fiscal year there were less than 10 transactions made via the organizer of trading at securities market, then OJSC “VolgaTelecom” market capitalization is calculated as the product of the shares quantity of corresponding category (type) by weighted average price of a share of this category (type) calculated as per the procedure of calculation of weighted average price of a valuable paper at RTS Stock exchange.

The calculation of weighted average price of a valuable paper, established in the course of trading at Stock exchange RTS, is made by using the price information on transactions concluded on the basis of addressless applications during the trading session. The calculation is made on the stock’s business days and is being performed every hour; the first calculation is made in an hour after the trading session opening. The official value is the value of weighted average price calculated at the time of the trading session closing. The calculation of weighted average price of valuable papers, for which the trading is suspended, is not made.

Weighted average price of the i-th valuable paper is calculated by the following formula:

$$AP_i = \frac{\sum_{k=1}^n (P_{ik} \times Q_{ik})}{\sum_{k=1}^n Q_{ik}}$$

Where n – the number of transactions selected for calculation, P_{ik} – the price of the k-th transaction under the i-th valuable paper, Q_{ik} – the volume of the k-th transaction under the i-th valuable paper.

2.3.2. The issuer's credit background

As of 01.10.2004 there are no credit agreements and loan contracts, the amount of major debt under which is 10 and more percent of OJSC "VolgaTelecom" net assets value.

2.3.3. The issuer's liabilities from the guarantee provided to third parties

There are no guarantees in the form of pledge and surety, making more than 5 % of the issuer's balance sheet assets for the 3-d quarter of 2004.

2.3.4. The issuer's other liabilities

As of 01.10.2004 there are no agreements, including time transactions, not reflected in the accounting balance-sheet which are capable to influence considerably the financial status, liquidity of the Company, sources of finance, results of activity and expenses.

2.4. The purposes of the emission and the trends of usage of resources obtained from the issuing securities placement

Interest rate paper bearer bonds of BT-1 series

State registration number of the securities issue: **4-43-00137-A**

State registration date of the issue: **24.01.2003**

The number of securities of the issue: **1 000 000 pieces**

The amount of the issue of securities by the face value: **1 000 000 000 rubles**

The basic goal of the emission is to raise the level of profitability of the Company.

The issuer realizes a number of large scale highly remunerative telecom projects aimed at the development of communication facilities of the Volga Federal district. The issuer develops cellular business using funds raised by means of the bonded loan. Besides, the funds raised by means of the bonded loan are invested in the development of interregional multi-service communication network, which is being created on the basis of already existing data transmission networks of the Company's regional branches.

2.5. Risks related to the acquisition of being placed (placed) issuing securities

Industry risks,
Country and regional risks,
Financial risks,
Legal risks,

Risks related to the issuer's activity.

2.5.1. Industry risks

The competition level in the telecom sector of the Volga Federal district economy is steadily growing.

The toughening of competition with alternative operators in all the branches of OJSC "VolgaTelecom" is observed in the sphere of value-added services and long-distance communication, despite the fact that the Company is still the leader in wire communication. The risk of reduction in income from long-distance communication due to the termination of traffic via IP-channels of alternative operators by the carriers affiliated to OJSC "VolgaTelecom" is increasing. The weakening of market positions of services in the area of fixed telephone communication occurs because of the growth of the cellular communication services market.

The following economic factors may result in the decline of the situation in the industry and the Company's market position:

- General decrease in the production volume and the reduction of economic growth rates;
- Economic risks specific to Russian Federation by and large, including the level of macroeconomic instability in the country, the existence of possibility of modifications in the legislation that may result in the reduction of the Company's income or in the toughening of the procedure of yield taxation;
- The ruble devaluation rates exceeding the tariff growth rate.

The following activities are planned in the case of negative developments in the region and in the country's economy:

- To optimize the structure of expenses;
- To readjust the Company's investment program;
- To make corrections in the Company's pricing and marketing policy;
- To adapt the structure of rendered services, market requirements being taken into account, for the purposes of profit maximization.

As a result of affiliation OJSC "VolgaTelecom" got the opportunity to use uniform infrastructure and technical facilities within the limits of the Volga Federal district, therefore the influence of industry risks on the Company's activity is estimated as minimal. This allows to render the maxim wide range of communication services to the customers, and also to optimally develop interregional communication networks for the reduction of prime cost and rising of profitability of services.

2.5.2. Country and regional risks

The economic situation in the regions and the relations with authorities of the Russian Federation subjects and with local authorities are developing positively, which influences favorably the activity of the Inter-Regional Company and its capacity to fulfill its obligations.

In future, the reasons of the situation destabilization may be:

- 1) Interference of the state regulatory bodies into Inter-Regional Company's activity. The Company is strengthening objectively its positions at the market. In addition, the number of

management subjects is reduced for the regulatory body. Hence, the consolidated company would attract more attention to its activity.

2) Reduction of financing by regional authorities of programs of telephonization of appropriate regions.

2.5.3. Financial risks

Currency risk. As of October 01, 2004 the share of contracts concluded by OJSC “VolgaTelecom” with suppliers and contractors in foreign currency is insignificant and it has the tendency for reducing. That is why it is possible to state that the issuer’s exposure to risks, related to the change of the foreign exchange rate is minimal.

Interest-rate risk. During the third quarter of the current year in the Company’s debt portfolio all bank credits had fixed rate of interest; besides, after the reduction of refinancing rate of the Russian Central Bank up to 13% annually beginning from 15.06.2004 for valid and newly concluded credit contracts, the rate of interest was also reduced. The interest-rate risk for the specified reasons is insignificant.

Inflation peril. According to the forecast of the Government of Russian Federation in 2004 the inflation rates will continue to decrease and amount to not more than 10 % a year.

As in the process of reasonable inflation the prices for commodities and materials tend to grow, the rated value of the Company’s financial needs for these purposes also grows. The Company conducts contract policy of deferment of payments for the purpose of reducing the real price of inventories by means of reducing the share of advance payments for the supplies and the increase in installment for the further payments.

So, the inflation peril is minimal.

2.5.4. Legal risks

The below listed aspects of Russia’s existing legal system generate uncertainty while taking legal decisions and decisions in business area by the issuer’s chief executive officers:

- Contradictions between the laws, decrees of the President of Russian Federation, the Government acts and directions of ministries, as well as between local, regional and federal legislation and statutory acts;
- Passing by the Government, bodies and departments of statutory acts without clear constitutional or legislative basis;
- Delays in passing or lack of by-laws, ensuring the execution of this or that legislation, causing significant flaws in statutory-legal base;
- Insufficient judicial and administrative practice of interpretation of relevant norms and limited value of judicial decisions as precedents;
- The lack of sufficient experience of interpretation and application of market legislation and liability to economic and political influence of judicial authority in Russia;
- Insufficiently efficient warranties of getting protection in Russian court and of enforced execution of judicial decisions.

Statutory-legal base in relation to property and securities is permanently in the course of development, which is why there is a risk of limitation of issuer's capability to attract the investments in the future, due to these the risks factors are:

- Imperfection of statutory base in Russia leads to contradiction of a number of laws and by-laws, which for the issuer may result in higher expenses and reduce the capability of managing its business;
- Developing and being frequently changed Russian taxation system generates considerable uncertainty and risks, which complicates tax planning and decision making by the issuer;
- Current, limiting currency regulation, which may prevent the issuer from making ordinary business operations and attracting foreign investments in the future;
- Changes of the rules of customs control and duties, of requirements to licensing the issuer's core activity, of judicial practice on the issues related to the issuer's activity (including the licensing issues), may also negatively affect the results of the issuer's activity, and also the results of current trials in which the issuer is involved.

2.5.5. Risks related to the issuer's activity

The trials in which the issuer is involved and also the occurrence of the issuer's potential liability under the debts of third parties, including the issuer's associated companies are insignificant.

Some kinds of activity the list of which is defined by federal laws are carried out by the issuer on the basis of special permission (license). There are no hindrances to the extension of the validity term of the issuer's licenses for the execution of special kind of activity that is why there are no risks related to the conducting by the issuer of activity without special permission.

3.1.3. Data on the issuer's creation and development

In 1993 as a result of privatization of state enterprise of communication and informatics "Rossviyazinform" there was registered joint stock company of open type (JSCOT) "Sviyazinform" of Nizhny Novgorod oblast, which in 1996 was transformed into Open Joint Stock Company (OJSC) "Nizhegorodsviyazinform". Thus, the issuer has been operating for 10 years and 9,5 months since the date of its state registration (15.12.1993) and has been established as per the Company's Charter for the unlimited period of activity. General objective of the company's establishment was to increase the efficiency of the state economic system and to transit from planned economy to market relations. Belonging to the area of service production determines the Company's major objective, which consists of obtaining additional profit via tracking and reacting to the market demands with further satisfaction of the demand for services.

In 1993 the company got independence in the management of its own production and financial resources. Following the obtaining of economic independence OJSC "Nizhegorodsviyazinform" started active modernization of communication networks by transforming the existing capacities and constructing the new ones only on the basis of digital data transmit systems. Annual increase in the network subscriber capacity amounted to 70 thousand lines per year.

Since 1996 due to active implementation of the latest communication services on the basis of high technological level equipment OJSC "Nizhegorodsviyazinform" has started to provide Internet access services. In addition, OJSC "Nizhegorodsviyazinform" has been gradually expanding the list of high-tech services – ISDN, phone cards system, as an element of intelligent network, IP telephony, xDSL-based digital access, voice mail, etc.

In 1994 OJSC "Nizhegorodsviyazinform" shares entered Russia's market of securities. In 1997 the company issued ADRs of Level I, they are traded at Berlin and Frankfurt currency stock exchanges.

Up to the second half of 2002 OJSC "Nizhegorodsviyazinform" had been the leading operator at telecommunications market of the city of Nizhny Novgorod and Nizhny Novgorod oblast. Being a natural monopolist in the area of providing the services of local, long distance and international telephone communication, the company was the 4-th by the size of telephone network among Russia's regional operators.

In 2002 on the basis of OJSC "Nizhegorodsviyazinform", by affiliating 10 enterprises of communication of Povolzhie, there was established Open Joint Stock Company "VolgaTelecom" – communication enterprise of Povolzhie.

The resolution on reorganization by way of incorporating to OJSC "VolgaTelecom" was adopted by overwhelming majority of votes at extraordinary shareholders meetings of incorporated companies in autumn of 2001.

In July of 2002 the Board of directors of OJSC "VolgaTelecom" adopted the resolution on increasing the Company's authorized capital. Additional issue of shares was placed within the limits of declared shares by converting the shares of incorporated communication operators of Povolzhie into them.

As of November 30, 2002 10 incorporated joint stock companies were excluded from the Single state register of legal entities; their property, assets, personnel were transferred to appropriate regional branches of OJSC "VolgaTelecom". The shares and bonds of these companies were converted into OJSC "VolgaTelecom" shares and bonds.

The incorporated company network covers the territory of 665 thousand square kilometers and provides communication services to over 21 million people.

OJSC "VolgaTelecom" has the licenses to provide the services of local, long distance and international telephone communication, recording communication, radio broadcasting, etc. in eleven regions of the Volga Federal district.

The Company is a large Internet provider, directly or via affiliated companies it provides the services of paging and mobile communication of various standards.

The share of import makes 6,5 % of total volume of supplies.

3.2.5. The issuer's products (works, services) sales markets

General information on the markets where the issuer conducts its activity:

The territory of the Volga Federal district of Russian Federation (except for the republics of Bashkortostan, Tatarstan, Perm oblast and Komi – Permyatsky autonomous national area).

The basic markets of OJSC “VolgaTelecom” are:

1. The market of local and intrazonal telephone communication.
2. The market of long distance and international telephone communication.
3. The market of value-added services (Internet and data transfer, ISDN, xDSL, IP-telephony, intelligent network, other services of data transfer).
4. The market of wireless and cellular communication.
5. Other services (wire audio broadcasting, recording communication, radio broadcasting, TV, satellite communication).

Basic customer groups of communication services provided by OJSC “VolgaTelecom” are:

- General public
- Business (large, medium and small)
- Budgetary organizations

Among negative factors which may influence the sale of OJSC “VolgaTelecom” production, there are:

- Fast growth of penetration level of cellular communication services;
- Toughening of competition among Internet providers;
- Expected sharpening of competitive struggle in the sphere of new technologies and services, with due account for the high level of potential competition.

The issuer's actions in the case if negative factors arise:

The Company's management regularly monitors and controls the change of a number of important indexes, defining the efficiency of the Company's activity in the sphere of economic, financial, technical and marketing policy, for the purpose of forecasting and operative reaction to the occurring and/or increasing influence of different negative factors. Strategic and medium term plans of the Company's development are elaborated in the frame of pessimistic developments, which provides the Company's activity with additional factor of safety in the case if crisis situation arises. Every year the correction of forecast of economic development and marketing strategy is made by the results of work for the previous period and of analysis of change of the Company's activity conditions.

3.2.6. Activity practice in relation to circulating capital and inventories

Inventory turnover ratio and the method of calculation are presented as of October 01, 2004:

Ratio description	Method of calculation	As of 01.10.04
Inventory turnover ratio, times *	Calculated as the ratio of prime cost of sold goods, works, services (line 020 of form 2) to average amount of	13

	inventories (1/2 (line 210 as of the beginning of the year + line 210 as of the end of the year)	
Duration of inventories turnover, days **	Calculated as the ratio of duration of the analyzed period to the inventory turnover ratio	20,8

* - describes the number of turnovers that the inventories may perform during the analyzed period

** - the specified ratio describes the duration of a cycle (the number of days) during which inventories transform into cash.

The analysis of change of turnover of the issuer's resources invested in inventories, allows for defining reserves for reducing the need in current assets by means of optimization of inventories. It is considered to be normal when the inventory turnover ratio (in times) increases, and the duration of inventories turnover (in days) decreases.

As of October 01, 2004 the Inventory turnover ratio amounted to 13, and the duration of inventories turnover - 20,8 days.

For the nine months of the current year the share of inventories in the Company's total volume of current assets grew from 16,6% to 21,4% and amounted to 952 839 thousand rubles, this was mainly caused by the increase of the inventory of raw materials, materials and other similar value by 118,9% and is related to seasonal cycle.

As of October 01, 2004 the major portion in the structure of the Company's current assets is falling on accounts receivable – 52,2% or 2 205 057 thousand rubles.

The issuer's policy as regards the current assets is mainly aimed to reduce the accounts receivable. The Company elaborated a package plan to reduce the accounts receivable.

3.2.7. Raw materials

In the course of communication services rendering raw materials are not used.

3.2.8. Major competitors

In the 3-d quarter the improvement of competition was observed in the regions where OJSC "VolgaTelecom" operates. The company encounters strong competition in three key regions – Nizhny Novgorod, Samara and Saratov oblasts. These oblasts are the most attractive for competitors and exactly at these territories OJSC "VolgaTelecom" should defend its market positions first of all. Along with a large number of regional alternative operators at the markets of these oblasts there are also such large companies as "Golden Telecom, Inc." ("Combellga" and "Comincom" joined it), CJSC "Company TransTeleCom", LLC "Global One". The main threat is from these well known companies, which conduct aggressive marketing policy, develop most modern telecommunication technologies, use flexible tariff policy (with individual approach to every customer), have a large number of sales staff and clear incentive system of employees motivation.

In spite of high competition level, OJSC "VolgaTelecom" holds large market share in respect of traditional communication services - of local, long-distance and international telephone communication. The total revenues share in this telecom sector, received by the Company in the region by the results of the period amounted to 90,2 %.

The share of OJSC “VolgaTelecom” in the Volga Federal district telecommunication market by the results of the period in respect of telecommunication services amounted to:

- 87,3 % - local communication services and providing access to PSTN;
- 92,22% - long distance and international communication;
- 68,41 % - data transfer services.

In the telecommunication markets of the regions where the Company conducts its activity there is considerable unsatisfied demand for value-added services: VPN, ISDN, dedicated lines, broadband access, IP-telephony, access to the Internet. In the years to come the increase in value-added services market capacity is expected, because of which OJSC “VolgaTelecom” establishes the following activity priorities in the specified market segment:

- further implementation of new technologies and services, corresponding to the market development trends, and also to the actual users requirements;
- competitive recovery of value-added services, including in the sphere of service maintenance, quality and tariff policy;
- further development of common data transfer networks (multiservice networks) in the framework of the Volga Federal district;
- introduction of universal cards for payment for communication services in all regions of the Company’s activity;
- elaboration of special tariffs and providing “packaged services”, including with traditional telecommunication services.

One of the priorities in the sphere of services is further development of prepayment cards system for telecommunication services: Internet-cards, service telephone cards, IP-telephony cards, pay telephone cards.

Major competitive advantages of alternative operators.

In local communication segment:

1. Lack of social obligations;
2. Construction of their networks on the basis of digital switches;
3. Individual approach to every customer;
4. Higher quality of customer servicing.

In long-distance and international communication segment:

1. Prompt reaction to market situation change;
2. Flexibility in relations with customers.

In Internet services segment:

1. Higher servicing quality;
2. Individual tariffs for every subscriber;
3. Individual approach to servicing every subscriber;
4. Prompt reaction to market situation change;
5. Lack of social obligations.

Competitive advantages of OJSC “VolgaTelecom”:

- Availability of developed infrastructure;
- Stable financial status, allowing for investing in most profitable segments of market and most perspective trends of business;
- Quality of rendering services;
- Consumer properties of services;
- Ability to form packages of integrated services.

Forecast as regards the probability of licenses extension.

1. The licenses for telecommunications services.

Upon the validity term expiry the licenses may be extended if all items of the license terms and conditions are observed, which is confirmed by the verification report of the territorial department of state supervision over communication and informatization (DSSCI), if the validity term of radio frequencies permission is extended (if used) and if the appropriate application is made to the licensor's address – Russian Federation Ministry for communication and informatization. Due to the fact that the Law "On communication" in a new wording became effective, in order to get the license for providing communication services for TV broadcasting, radio broadcasting and broadcasting of additional information the applicant of the license must submit notarized copy of the license for broadcasting (MTVRB).

2. (for item 29 of the Table) Licenses for broadcasting are extended on the basis of the verification report of DSSCI confirming the compliance with the license terms and conditions and if the authorization documents on the possibility of radio frequency resource usage are submitted. The licenses are extended by Russian Federation Ministry for the press, TV-radio broadcasting and mass communication tools.

3. Licenses for the activity, listed in items 17 – 28, are extended subject to timely submittal of documents package, as established by the law, to the licensor's address.

3.4. The plans of the issuer’s future activity

OJSC “VolgaTelecom” strategic goal is to strengthen by 2006 the Company’s leading positions at the Volga Federal district market and to hold the market share at the level not lower than 50%. It is planned to increase the sales by 56% compared to 2003 and increase the proceeds from telecommunication services up to US\$758,5 million, and the gross profit - up to US\$772,9 million. The average annual growth rate of income in 2003-2006 will amount to 24%.

One of priority trends of OJSC “VolgaTelecom” activity as related to the increase in profit, raising the effectiveness of activity and stabilization of financial status, is the gain of basic telephone sets. The Company conducts active activity connected with the network development, increase in the network capacity.

As regards the income growth rates, budgeted revenue structure profile, the priority belongs to value-added telecommunication services. The Volga Federal district telecommunication services market is defined by low level of penetration of value-added telecommunication services (intelligent network services, broadband access services and others), the tariffs for which are not subject to state regulation. The main goal of OJSC “VolgaTelecom” in 2004-2005 is strengthening positions at the market of perspective and highly profitable services and maximum possible increase in the value-added services income share in the total Company’s income structure for the purpose of rising of total level of profitability.

Inter-regional multi-service data transfer network should become a serious competitive advantage of the Company (the first phase of its construction in Nizhny Novgorod oblast is completed). The construction of inter-regional multi-service network of OJSC “VolgaTelecom”

would allow to create virtual networks of large corporate customers in the Volga Federal district, and also to solve corporate tasks for information exchange between OJSC “VolgaTelecom” branches.

The other important trend of the company’s activity is further promotion of intelligent network services. The major task of an intelligent network is to provide the customer with the opportunity of getting any service, and the operator – with the capability to deliver this service, to calculate it and define the tariff. The demand for these services is quickly growing, as Russia’s advertising market is developing and the number of communicative channels is increasing.

The Company’s management plans include organization of Call-centers or Calls Processing Centers. OJSC “VolgaTelecom” is planning to open a call-center in Nizhny Novgorod (and then in other regional centers of Povolzhie) both for providing reference information to its customers and for servicing commercial organizations interested in Call-center services.

The main strategic trends of OJSC “VolgaTelecom” development in the medium term outlook are the following:

- satisfying solvent demand for basic services by means of raising of using network telephone capacity;
- establishment of uniform centers of payment and services;
- large-scale development of centers of providing the Internet, connection of regional data transfer networks to the Internet;
- implementation of intelligent network services;
- improvement of corporate clients’ service, creation of range of services optimum for them.

The long- term strategic trends of OJSC “VolgaTelecom” development are the following:

- creation of modern telecommunication system, including debugged digital telecommunication network, equipped with digital automatic switching centers, digital transfer systems, fiber-optic telecommunication lines;
- universal implementation of new technologies: ISDN, IP-telephony, ATM, xDSL;
- integration of telecommunication infrastructure and management with international informational and switching systems;
- raising the quality of rendered services;
- optimization of the list of rendered services, with the purpose of increasing the share of the most progressive kinds of them;
- maximization of profitability of the Company’s activity;
- optimum tariff policy in view of meeting the interests of the Company’s shareholders and the entire Company;
- strict control over expenses level;
- conducting active marketing policy;
- raising the quality of corporate governance.

The change of the Company’s profile is not planned. The Company will continue to conduct its activity in accordance with valid licenses for providing communication services and the approved Charter of the Company.

Uncovered loss sum as of the report date, rubles	n/a	n/a
Ratio of uncovered loss as of the report date to the balance-sheet total	x	x

* The index “efficiency of labor” is calculated by the method applied in budgeting: proceeds/staff on the payroll, including employees working by civil contracts and dual job holders.

The data presented in the table show the stable growth of proceeds and profit.

4.1.2. Factors that affected the change of the amount of proceeds from the issuer’s sale of goods, products, works, services and of profit (losses) of the issuer from the core activity.

The issuer, while rendering telecommunication services, obtains the main part of the profit from the following sources:

- development of telecommunication facilities;
- the increase in the exchange of outgoing long-distance calls;
- widening of the range of telecommunications services rendered, including intensive development of value-added telecom services;
- change of tariff policy.

For 9 months the increase of basic telephone sets amounted to 180,063 thousands numbers. The income obtained by the Company from providing access to the telephone network, amounted to 1 063 727 million rubles. It remains considerable source of the Company’s income, making 19,3% of city’s and rural telephone network services income or 8,2% of telecommunication services income.

Holding and increasing the dynamics of the Company’s network development affected the level of income obtained from long-distance and international traffic. The Company’s income in this industry amounts to 5 865 million rubles. Long-distance and international exchange grew by 19,1%, which in the conditions of dynamic long-distance communication services market, where the number of seller is growing, is not a bad result. Due to long-distance services the gain of income is assured in the amount of 28,6%.

Progressing development of telecommunication services, rendered by means of new technologies, allowed to obtain income of value-added services in the amount of 656,7 million rubles.

4.2. The issuer's liquidity

The indexes describing the issuer's liquidity as of 01.10.2004, are presented in the table:

<i>Thousand rubles</i>	
Index description	As of 01.10.2004
Own current assets, thousand rubles	- 7 496 737
Financial leverage ratio	0,8
Ratio of own funds autonomy	0,54
Economic security of inventory with own current assets	- 7,9
Permanent asset index	1,53
Current liquidity ratio	0,7
Fast liquidity ratio	0,4

** For the calculation of indexes the methods recommended by Russia's FCSM were used.*

For 9 months of 2004 the issuer's capital investments were financed by means of borrowed funds, as the Company's active investment activity assumes sharp increase in using borrowed funds, and correspondingly, the change of index of own current assets.

It is necessary to point out considerable cheapening of borrowed funds cost for the analyzed period, which permits to use them more in the Company's money turnover.

The level of own current assets index is not a negative fact for the Company, as the main goal of the issuer's financial policy in the specified period is the development of telecommunication facilities of the Volga region. Borrowed funds are defined as one of the main sources of the Company's investment activity.

As of 01.10.2004 the financial leverage ratio is equal to 0,8 which corresponds to the norm and shows the issuer's high financial stability.

The issuer's investment activity financing by means of borrowed funds is 80%.

For the considered period the ratio of own funds autonomy is also within the limits of norms. As of 01.10.2004 the share of own capital in the assets amounted to 54%.

The permanent asset index as of 01.10.2004 is more than 1, as for the specified period the issuer's own funds were insufficient to cover capital investments.

As of 01.10.2004 the current liquidity ratio amounted to 0,7, and the fast liquidity ratio – 0,4.

The Company's belonging to the services production sphere defines the basic goal of the Company which is to obtain additional profit by tracking and reacting to the market demands with the further satisfaction of demand for the services.

The first and major task of the Company is to keep and to increase the market share of local telephone communication services, which is at present 87,2%. Annual increase of share of income from this segment is clearly seen, this is to a considerable extent facilitated by annual industry development as well as by flexible tariff policy.

The total gain of telephone lines for the specified period (1999-2003) made 960 thousand lines. In addition, one more aspect of this communication industry development is the replacement of analog switching equipment with digital one. The equipment replacement allows for improving the quality of provided services, for introducing additional accompanying services, thus improving servicing and creating competitive advantages at the market. In 2001 the network digitalization made up 33%. In 2003 this indicator is equal to 48%.

The tendencies of long-distance and international communication services development are connected with the development of alternative communication services, such as IP-telephony, Internet, etc.

This results in decrease of share of income from long-distance and international communication services in the total share of proceeds. Simultaneously, the dynamics of income from long-distance and international communication services is affected by the decrease of average profit rate per call minute, which is connected with redistribution of outgoing traffic of long-distance communication between intrazonal and trunk traffic; and for international communication between the Baltic States, CIS countries and foreign countries. From 2000 to 2003 the rate of decrease of average profit rate for long-distance communication is 7,4%; for international communication – 2,04%.

For the last three years the largest growth rate is with new communication services, such as Internet, ISDN, IP-telephony, intelligent platform services, etc.

The tendencies of core activity development for 1999 – 2003 are detailed below.

1999

The Company's activity was aimed to the solution of traditional tasks for basic communication services development and for the solution of priority tasks: further network digitalization; development and introduction of new technologies and products (Internet, ISDN).

During the year 11 new automatic telephone exchanges and 5 remote substations of total capacity of 52 thousand numbers were commissioned, this allowed to bring the total installed capacity up to 808, 1 thousand numbers. By the end of 1999 the installed capacity of digital automatic telephone exchanges made up 241, 2 thousand numbers or 30% of the total network capacity. Total volume of subscriber lines, switched from old facilities to the new ones, made up about 18 thousand numbers. Total volume of digital streams in SDH transport network was increased by 357 units and amounted to 798 of 2 Mbps streams. At rural networks digital transmission systems "IKM-30", "IKM-15" and "Radan" microwave radios were installed and commissioned, this allowed to bring the level of digital channels up to 68% of the total number in operation.

Due to connection of secondary and primary groups at intra-oblast communication lines and downloading of digital SDH network of Nizhny Novgorod oblast and also due to the commissioning of digital microwave radios, the extension of digital telephone channels was increased by 79,4 thousand channels/km. The gain of outgoing automatic channels of automatic

long-distance communication made up 460 channels. The results of local and long-distance telephone network development allowed for increasing the traffic by 21%.

Implementation of new services is one of the most important tasks of OJSC “Nizhegorodsviyazinform”. The company provided the following services to the population:

- Additional types of servicing;
- All kinds of access to Internet;
- ISDN, video telephone, video conferencing;
- Service Telephone Card (STC).

In 1999 “Internet for All” service was introduced. About 1500 Internet subscribers were registered by the end of the year.

2000

In order to hold the positions at the market and to increase the competitiveness of its services, the Company intensively developed its network and in particular: it upgraded the existing network and continued the construction of the new one with the use of advanced technologies, which served as the foundation for mastering new services and occupation of market segments. To achieve this digital telephone exchanges were commissioned, the Company builds digital transmission systems by using hi-tech equipment, introduces digital subscriber radio access equipment, automatic telephone exchange equipment.

In 2000 alternative carriers became more active, especially at the market of data transfer services and Internet. In the nearest future it is possible to expect the emergence of new competitors at this market, and in the first place from natural monopolists, having or constructing transport network (RAO “Unified Energy Systems of Russia”, RAO “Gazprom”, Russia’s Ministry of Railways).

Target strategy of OJSC “Nizhegorodsviyazinform” for the period to 2004 is to increase competitiveness and to develop the production on the basis of already available infrastructure.

One of the main conditions of increasing services competitiveness is application of new technologies (ISDN, Internet, telephone “+”, voice mail, IP-telephony). It should be noted, that Internet is one of high profitable services, for two years of intensive development the Company’s share at the Internet market in Nizhny Novgorod reached 30% and in Nizhny Novgorod oblast – about 90%. In 2000 the project “Internet to schools, hospitals, museums of Sovetskiy district of Nizhny Novgorod” was completed (18 schools, 3 hospitals, central library system – in total 45 organizations). This allowed for increasing the number of Internet users up to almost 5000. As of 01.01.2001 the number of Internet subscribers was 4 951 (1400 – as of 01.01.2000). Service-Center was established in Nizhny Novgorod.

In 2000 the Company continued downloading DECT “DRA-1900” subscriber radio access system equipment. As of 1.01.2001 in the oblast there are 960 telephones with radio access.

At inter-station communication network of Nizhny Novgorod city’s telephone exchange, the transport communication network SDH was expanded by commissioning a new transport node St-20 in linear mode of STM-4 level.

Installed capacity of SDH transport network was increased by 60 E1 compared to 1999 and as of 01.01.2001 made up 850 streams of E1.

As of 01.01.2001 the installed capacity of city’s automatic telephone software-controlled exchanges made up 619231 numbers or 83,9 % of total installed capacity.

By the end of 2000 the total capacity of the city’s telephone exchanges in Nizhny Novgorod and in 10 towns of the oblast in operation was 523496 numbers.

In 8 towns of the oblast the city’s telephone exchanges were in trial operation. Total capacity of automatic telephone exchanges in these towns made up 43456 numbers.

Time-based billing system of the specified automatic telephone exchanges is in operation since 01.01.2001.

As of 01.01.2001 the installed capacity of rural automatic telephone software-controlled exchanges made up 2048 numbers or 2,3% of the total installed capacity of rural telephone exchanges.

During the year the automatic telephone exchanges of total capacity of 40,8 thousand numbers were put into operation, including in Nizhny Novgorod – 20 thousand numbers, 41 thousand telephone sets were installed, including 35,5 thousand in apartments of citizens. All this allowed to increase the number of telephones per 100 residents in the oblast by the end of the year up to 21, 9.

In 2000 the Company continued to install universal payphones of TMC-БМ-01 type of “Kvarts” make. During the year 116 universal payphones were additionally installed at city’s and rural telephone networks.

2001

The Company’s policy in relation to traditional communication services is oriented to holding the positions at the market with simultaneous increase of degree of satisfaction of solvent demand.

For the greatest satisfaction of solvent demand the Company continued intensive activity for the network development, upgrading of communication facilities and technological processes, improvement of quality and increase in provided services volumes.

Special attention was paid to the application of new technologies (ISDN, Internet, Telephone Plus, voice mail, IP-telephony). During the two years of intensive development, due to flexible tariff policy and ongoing perfection of its technical base, the Company became the leader.

Current modernization and the development of telephone communication network are aimed at creation of modern, hi-tech, multi-service telecommunication network. When designing a digital network the basis is the strategy of deploying digital automatic telephone exchanges in such a way so that there is the opportunity of access to digital network services in all districts of the city, and in the first place in the centers of business activity. Thus, the most active part of Nizhny Novgorod business already has the opportunity of using modern communication services in its activity.

OJSC “Nizhegorodsviyazinform” is consistently realizing market strategy of integrated growth, leading to achieving the strategic goal of the Company –the leader (managing interregional company), and namely – creation and realization of scope of competitive services, getting maximum possible profit and increasing investments efficiency.

Major essential events of the year contributing to improvement of the activity results:

- Automatic telephone exchanges of total capacity of 40,0 thousand numbers, including 20 thousand numbers in Nizhny Novgorod were put into operation;
- 44, 3 thousand telephone sets were installed, including 19, 6 thousand in Nizhny Novgorod, out of them 15, 8 thousand telephones were installed in apartments. This allowed to increase the number of telephones per 100 residents, which as of 01.01.2002 in the oblast was 22,7, and in Nizhny Novgorod – 32,5;
- The project “Internet to schools, hospitals, museums” for Leninskyi district of Nizhny Novgorod was completed (21 school, 1 hospital, 1 library);
- The development of service centers network in the oblast is continued, 5 centers were established in Nizhny Novgorod oblast in 2001;
- Additional services were provided to 73800 subscribers;

- ISDN services were provided to 467 subscribers;
- 82,4 % of rural telephone exchanges are equipped with automatic number identification function, that allowed to organize automatic long distance telephone communication for rural subscribers;
- For 163 subscribers the telephones were installed by using DRA radio equipment;
- 52 universal payphones were installed;
- The first stage of SDH transport network based on synchronous transmission systems was put into operation at Nizhny Novgorod city's telephone exchange in 1997. Currently, in Nizhny Novgorod SDH network has three transport rings of total extension of 144 km (totally 213 km of fiber-optic cable were installed).

The Company pays special attention to the development of services of access to the Internet. The Company has designed and carries out the set of activities to expand the base of Internet users. In 2001 OJSC "Nizhegorodsviyazinform" took the leading positions in providing switched access to Internet. The users are provided the entire range of services of data transfer network, starting from dial-up access to organization of gateways, dedicated channels and creation of corporate network for customer data transfer. ISDN, xDSL digital access technologies are applied.

Exclusive service "Internet for All" provides the access to Internet over long-distance communication channels. In Nizhny Novgorod oblast this service is provided to 80% of all Internet users.

The Company continued realization of the project of creating Internet-clubs, providing session access to the network. 6 Internet-clubs are operating, 3 of them are in Nizhny Novgorod.

In 2000 the Company won the tender for realization of the program "Internet to schools, hospitals, museums". In 2001 21 school, 1 hospital and 1 library were connected to Internet via an allocated channel.

The first stage of construction of corporate multi-service network of data transfer is completed; the network includes 21 nodes in Nizhny Novgorod and 18 nodes in Nizhny Novgorod oblast. The network is built with fiber-optic cable. 19 nodes of access to data transfer network in Nizhny Novgorod and 9 nodes of access in Nizhny Novgorod oblast were put into operation and modernized.

The Company continued the activity for connecting the subscribers to digital network with integration of ISDN services. By the end of 2001 the number of operated ports amounted to 467. Within the terms of providing ISDN services the Company realized the tasks of combining remote segments of corporate network of data transfer and organization of video conferences for subscribers of Nizhny Novgorod and Dzerzhinsk. The program of telemedicine development on the basis of ISDN equipment was continued. There were a number of consultations (video conferences) with participation of medical personnel from Nizhny Novgorod and leading medical institutes and hospitals from Moscow.

The realization of the project for creating the network of Service Centers was continued. The main idea of the project is to provide end-to-end services to customers as regards the organization of communication on the basis of advanced technologies: from installation of a telephone set to the development and realization of corporate network as per the customer's requirements. By the end of the year 5 Service Centers were in operation in Nizhny Novgorod and in Nizhny Novgorod oblast.

2002

Under the conditions of the Company's incorporation the paramount issue is to work out uniform technical policy, which will serve for the solution of the major Company's task – modernization of the network and meeting the demand for OJSC "VolgaTelecom" services.

The policy as regards traditional communication services is oriented for holding the positions at the market with simultaneous increase of the degree of meeting solvent demand. For this the Company continues intensive activity in the network development, improvement of communication facilities and technological processes on the basis of modern equipment, improvement of quality and increase in the volume of offered services.

By the end of the year the number of city's telephone exchanges was 928 with total installed capacity of 3 532 619 numbers. During the year the city's telephone exchanges' capacity increased by 367 thousand numbers.

By the end of 2002 time-based billing system of calls cost was in operation in Nizhny Novgorod, Orenburg, Penza oblasts and in the Republic of Mordoviya.

The activity in installation and putting into operation of ANI function at rural telephone networks was continued. The capacity of rural telephone exchanges equipped with ANI function made up 643 103 numbers.

With the development of new modern kinds of communication, the demand for telegraph services is gradually going down.

Wire broadcasting is a toss-making sector, so OJSC "VolgaTelecom" carries out the actions for changing-over rural wire broadcasting into on-air broadcasting, which allows to reduce total costs of wire broadcasting and increase the profitability and the quality of work of city's broadcasting centers. The program of wire broadcasting change-over into the on-air broadcasting is developed for each branch of the Company.

OJSC "VolgaTelecom" network of on-air broadcasting includes 73 low power radio broadcasting transmitters of less than 1 KW power and 19 powerful transmitters of 1 KW power and above.

In a number of branches of OJSC "VolgaTelecom" there are in operation TV transmitters for receive and broadcasting of TV programs. At the same time the Company is actively developing the existing networks of cable TV in Orenburg and Samara branches, in the branches of Chuvash Republic and the Republic of Maryi El, and is constructing new systems of cable TV. It is planned to construct new cable TV systems, in Nizhny Novgorod city including. The first stage of the construction will be realized in 2003 and is designed for connecting 75 000 subscribers.

The development of new communication services is of great importance for OJSC "VolgaTelecom".

One of the main tasks is to strengthen positions at the market of hi-tech kinds of communication. All branches of OJSC "VolgaTelecom" provide services of Internet access both by dial-up technology and over allocated lines.

By the end of 2002 in the Volga region the number of users with dial-up access to Internet was about 204 thousand, 107 thousand of them use the services of OJSC "VolgaTelecom". Thus, the Company's share at the market of dial-up access to Internet is 52%.

The number of customers for access services over the allocated line is about 1600, which as per OJSC "VolgaTelecom" estimation makes up from 45 to 50%.

The service of wideband digital access is being actively implemented. By the end of 2002 in OJSC "VolgaTelecom" the number of connection points with xDSL technology was 583, 48% out of them were in Nizhny Novgorod branch.

IP-telephony is a perspective service. The development of IP-telephony service is planned to be carried out in 2 directions:

- The first one is installation of IP-telephony nodes for DLD & ILD communication. The service is provided by application of pre-paid cards;
- The second direction of IP-telephony development is a "package" service; provision of access to PSTN via data transfer network. Here the "last mile" is xDSL wideband access. This is the first stage of change-over to NGN (Next Generation Network) with packet switching.

The other large project is the construction of Intelligent network based on a single platform. In 2002 the contract was signed with “Huawei Technologies” company for Tellin[®] Intelligent platform. On the basis of this platform 5 intelligent services will be provided: 4 services from CS1 set (free of charge call - **FPH**, voting over telephone - **VOT**, call with additional payment - **PRM**, call by pre-paid card - **PCC**), and one service (universal access number - **UAN**) – for testing and further certification

2003

Financial and economic and production indexes of OJSC “VolgaTelecom” for 2003 reflect the efficiency of the incorporation of regional communication enterprises into the joint interregional company which has been finished by the end of 2002.

By the results of the year the Company achieved the planned level of income and profit.

The gain of income from rendering telecommunications services for the entire Company amounted to **3 653 541** thousand rubles.

The income gain was ensured due to the development of telecommunication industries, the increase in outgoing paid exchange, increase in tariffs, and the change of procedure of formation of tariffs on local telephone connections for privileged consumer categories (veterans, invalids), the obtaining of income for the incoming traffic from OJSC “Rostelecom” over long-distance and international telephone communication, and namely:

- ▶ the network development and the increase in long-distance exchange by 1 971 795 thousand rubles or by 54 %;
- ▶ increase in telecommunications services tariffs - 1 396 762 thousand rubles or 38 % of the gain sum, including due to the increase in tariffs for telecommunications services regulated by the state, by 1 028 965 thousand rubles or 28 % of the total sum of income gain;
- ▶ the change of calculation methods in respect of services rendered by OJSC “Rostelecom” by 284 984 thousand ruble or 8 % from the total sum of income gain.

The Company’s potential formed after the incorporation of 11 regional carriers, allows to extend annually the volume and to improve the quality of services in all telecommunications sub-industries.

As of January 01, 2004 the **total installed capacity of city and rural telephone exchanges amounted** to 4462 thousands lines.

For the previous year automatic telephone exchanges with total capacity 455,5 thousand lines were commissioned. During 2003 the installed capacity of city and rural telephone exchanges grew by 224 thousand lines, the growth rate vs. the previous year - 105,3%. The installed capacity of digital automatic telephone exchanges of rural telephone communication grew faster – 144,55%. This caused the growth of the share of digital exchanges in the total installed capacity of rural exchanges switching facilities and by the results of the year amounted to 14,2 %.

The total extension of long-distance channels as of January 01, 2004 amounted to 15236,8 thousand channel/km, the gain for 2003 - 3630,7 thousand channel/km, including of digital network 12983,4 thousand channel/km (85,2 %), the gain – 3859,9 thousand channel/km.

The extension of digital network channels is formed by the digital systems of transmission of synchronous (11537,5 thousand channel/km - 88,9%) and plesiochronous (1445,9 thousand channel/km -11,1%) digital hierarchy.

In the report year the production activity of OJSC “VolgaTelecom” cable industry employees was aimed at the reconstruction of cable industry facilities for the purpose of improving qualitative indexes, increase in income and reduction of operational costs. So in 2003 the works aimed at upgrading switching facilities of telegraph industry were conducted. Instead of physically and morally outdated exchanges of OP ETK-KS network и and of AT/TX Nicola – Tesla network, the integrated exchange

TK-AT-600 was installed in the telegraph shop of long-distance telephone telegraph communication of Saransk.

In the fourth quarter of 2003 according to the investment plan, in the branch in the Republic of Chuvashiya the reconstruction of public telegraph network and AT/TX on the basis of telegraph switching server TKS "Vector 2000" produced by CJSC "LInTekh", Moscow city, was completed.

In Orenburg oblast's radio-TV transmission centre OJSC "VolgaTelecom" finished the works on changing over the space communication receiving stations from analog to digital mode of "DMT-1000" type - 268 sets.

9 radio broadcast transmitters were installed – in Kirov branch, branch in the Republic of Mordoviya, in Orenburg and Samara branches, for the purpose of broadcasting the program "Radio of Russia" in the zones of intermittent reception of RTRS VGTRK transmitters, for the change over of subscribers from wire broadcast to off-the-air reception of programs.

The first phase of cable television was commissioned in Nizhny Novgorod, 292 subscribers were connected to it. The total design capacity is 2300 subscribers. 28 TV programs are being broadcasted; the subscribers of cable television got the opportunity of high-speed access to the Internet.

The number of cable television subscribers grew in the branches of Republics of Chuvashiya and Maryi El. MMDS system functions in Samara branch (Syzran and Toliyatti towns). The construction of the first phase of cable television network in Orenburg has been completed.

The introduction by the branches of services: "Internet for all", Internet by prepaid cards and service telephone cards, the implementation of successful marketing policy allow to win successfully subscribers at the competitive market of Internet services. The new service introduced by Saratov's branch "Internet - free access" became popular and effective.

The number of the Internet-users is now 190 thousand, out of them the largest part – 50 thousand in Nizhny Novgorod branch. The construction of access nodes using digital servers produced by the leading manufacturers CISCO, LUCENT, HUAWEI, assured the growth of the number of users of dial-up Internet access services.

The market situation shows the essential interest of enterprises in connection to OJSC "VolgaTelecom" data transmission networks for the purpose of consolidation of available segments into unified corporate networks of data transmission at regional and interregional level. For example, the contracts with RTKomm.RU on the connection of objects of Federal Target Program "Electronic Russia", all the branches participated in their realization.

The other important trend of activity is the promotion of intelligent network services. If in 2002 the income from Intelligent network services of the entire interregional company amounted to about 12 million rubles, then in 2003 it has achieved 94,8 million rubles (out of them 99% is the share of service telephone cards). The most successful in the promotion of prepaid service telephone cards were the branches in the Republic of Udmurtiya, and also Penza branch and Ulyanovsk branch.

In the Republic of Maryi El the start of operation of service telephone card platform based on AVAYA facilities was successful.

In Ulyanovsk city in 2003 IP-telephony service using prepaid cards was introduced.

In the branch in the Republic of Udmurtiya the services are successfully developed on the basis of intellectual platform "Protey". At present, the uniform reference services "09" of Izhevsk city and of the Republic, and also manual switch shop of trunk line exchange are changed over to the contact-center "Protey" platform. The system of automatic information on the client account status of residential sector subscribers, of providing information on long-distance tariffs and codes, is started. Service telephone cards in Udmurtiya are the universal instruments of payment for the telephone communication services and for the cellular communication and the access to the Internet.

5.3. Data on the size of remuneration, benefits and/or compensation of expenses for each management body of the issuer

THE COMPANY'S GENERAL DIRECTOR

Criteria of determination and the size of remuneration of the Company's General Director are stipulated by the terms and conditions of the Labor contract approved by the Board of directors (Minutes № 2 of April 10, 2003).

THE COMPANY'S BOARD OF DIRECTORS

The amount of income of all members of the Board of directors for 2003: **22 149 719 rubles**

The remuneration of the members of the Board of directors for 2003 is defined in accordance with the Provision on the Board of directors and amounts to 13 394 545 rubles. The members of the Board of directors who are the staff members of OJSC "VolgaTelecom", received in 2003 the salary in the amount of 3 119 547 rubles according to the staff schedule, and also bonuses in the amount of 3 038 828 rubles and other income from the issuer in the amount of 2 596 799 rubles.

Members of the Company's Board of directors, during the period of their duties execution, are paid remuneration and compensations of expenses related to their execution of functions of the Board of directors members.

The remuneration to the members of the Board of directors consists of the quarterly and annual ones.

Quarterly remuneration to each member of the Board of directors is established in the amount of 200 000 rubles.

For the Chairman of the Board of directors the remuneration is fixed with coefficient of 1.5.

Quarterly remuneration of a member of the Board of directors is decreased by:

30% - in case of his (her) presence at less than half of sessions of the Board of directors held in the form of joint attendance;

100% - if he (she) participated in less than half of all held sessions of the Board of directors

For the quarter, in which the re-election of the Board of directors occurred, the remuneration to a member of the Board of directors is paid proportionally to the time worked in this quarter.

Annual remuneration for the entire structure of the Company's Board of directors is established as the sum of deductions according to norms (percent):

- of EBITDA of the Company by IAS accounting statement data for the report year;
- of the Company's net profit by the results of the report year, allocated to the payment of dividends.

Annual remuneration is distributed among all members of the Board of directors in equal shares. Annual remuneration of a member of the Board of directors is decreased by 50% in case of his (her) participation in less than half of all Board of directors sessions held during the period of his/her term of office.

Norms (percent) of deductions for the calculation of annual remuneration are defined by the resolution of the shareholders general meeting, electing the specified structure of the Board of directors.

Annual remuneration to a member of the Board of directors is paid not later than 3 months after the termination of the term of office of the specified Board of directors' structure.

The Board of directors members who are the members of the Company's Board of directors committee, are paid an increment to quarterly remuneration, connected with performance by them of their functions of the Board of directors committees members, in the amount of 40 000 rubles (for the participation in each Committee), and the Board of directors' member may not be in more than two Board of directors' committees simultaneously.

For the Chairman of a committee of the Board of directors the specified increment is established with coefficient of 1,25.

The Board of directors' members are entitled to participate in option programs, carried out by the Company.

According to the resolution of the annual general meeting of shareholders of June 22, 2004, (minutes №4), the following norms (percent) of deductions are approved for calculating annual remuneration to the Board of directors' members, elected at the specified annual general meeting of shareholders:

- in the amount of 0,14% of EBITDA by IAS accounting statement data for 2004;
- in the amount of 0,22% of the Company's net profit for 2004 allocated to the payment of dividends.

THE COMPANY'S MANAGEMENT BOARD

The amount of income of all members of the Management board for 2003: **37 212 084 rubles**

The income of Management board members in 2003 is formed by their income as staff members of OJSC "VolgaTelecom", including the salary in the amount of 12 488 180 rubles according to the staff schedule, bonuses in the amount of 10 161 771 rubles, compensation of expenses in the amount of 225 060 rubles and other income from the issuer in the amount of 3 879 693 rubles and also by the remuneration, defined in accordance with the Provision on the Management board, in the amount of 10 497 380 rubles.

The members of the Company's Management board during the period of their duties execution are paid remuneration and compensations of expenses related to their execution of the functions of the members of the Management board.

The size and the procedure of payment of remuneration and also its distribution among the Management board members are defined by the resolution of the Company's Board of directors.

The Management board members are entitled to participate in option programs, carried out by the Company.

The data on income of persons being members of several management bodies of the issuer are provided in the data on collegiate management body – the company's Board of directors.

5.4. Data on the structure and scope of competence of the bodies controlling the issuer's financial-economic activity

For the purpose of control over OJSC "VolgaTelecom" financial and economic activity, the Auditing committee, structural subdivision - Department of internal audit, performing the functions of internal control, are created and also the independent auditor is involved.

Auditing committee – is the Company's independent body of control, elected at the annual shareholders meeting for the period till the next annual general shareholders meeting, and consisting of 5 persons. (*Article 17 of the Charter*)

Powers of separate members or of the Auditing committee can be terminated early by a resolution of the general meeting of shareholders. In case of the early termination of office of Auditing committee members, the authority of the new Auditing committee shall be effective till the next annual general meeting of shareholders.

In a case when the quantity of members of the Auditing committee decreases to less than half of elected members of the Auditing committee, the Board of directors is obliged to convoke an extraordinary general meeting of shareholders for the election of a new Auditing committee. The remaining members of the Auditing committee carry out the functions till election of a new Auditing committee at the extraordinary general meeting of shareholders.

The competence of the Auditing committee comprises the following issues:

- Checking of reliability of the data contained in reports and other financial documents of the Company;
- Revealing the facts of infringement of procedures of book keeping and presenting the financial reporting established by legal acts of the Russian Federation;
- Checking observance of legal norms at calculation and payment of taxes;
- Revealing the facts of infringement of legal acts of the Russian Federation according to which the Company carries out its financial and economic activity;
- Consideration of expediency of financial and economic operations of the Company.

Checking (audit) of financial and economic activity of the Company by the Auditing committee is carried out by the results of the Company's activity for a year.

Checking (audit) of financial and economic activity of the Company is carried out also at any time:

- on the initiative of the Auditing committee of the Company;
- by the resolution adopted by the general meeting of shareholders of the Company;
- by the decision of the Board of directors of the Company;
- at the request the shareholder (shareholders) of the Company, owning in aggregate at least 10 percent of the Company's voting shares on all issues of the competence of the general meeting of shareholders as of the date of presentation of the request.

At the request of the Auditing committee, the persons occupying posts in the Company's management bodies are obliged to present documents on financial and economic activity of the Company.

The procedure of activity of the Auditing committee, and also the size and the procedure of payment of remuneration to the Auditing committee members are defined by the Provision on the Auditing committee of the Company, approved by the general meeting of shareholders.

In order to secure permanent internal control over all economic operations in the Company, there is a special structural subdivision, created in the Company, which is not dependent on the executive bodies of the Company - Department of internal audit, the activity of which is directly controlled by the Board of directors of the Company.

The functions of the specified structural subdivision, the procedure of its activity, the procedure of appointment of the employees, requirements to them are defined by an internal document approved by the Board of directors of the Company.

For checking and confirming the correctness of the annual financial reporting, OJSC "VOLGATELECOM" annually employs a professional auditor. For 2004 the general meeting of shareholders approved CJSC "ERNST AND YOUNG VNESHAUDIT" as the Company's auditor. The terms and conditions of the contract concluded with the auditor, including the size of payment for its services, are approved by the Board of directors of the Company.

Audit of the Company's activity is carried out at any time upon the request of shareholders whose aggregate share in the charter capital is at least 10 percent. Shareholders - initiators of audit submit a written request to the Board of directors which should contain the cause of request, the name (names) of shareholders, quantity and category (type) of shares belonging to them, the signature of the shareholder or of his/her authorized representative. If the request is signed by the authorized representative, the power of attorney should be attached to it.

The rights granted by shares to their owners:

The rights of a shareholder for getting the declared dividends:

A shareholder has the right to get dividends in the procedure stipulated by Russian Federation current legislation and the charter, in case they are declared by the Company.

The dividends are paid from the Company's net profit, indicated in the Company's profit and loss statement based on the results of the operation for the year.

The resolution on payment of annual dividends, the size of the annual dividend and the form of its payment on the shares of each category (type) is passed by shareholders general meeting.

The dividends on ordinary shares are paid by the Company during the period set by the resolution of shareholders general meeting on payment of the Company's annual dividends. The specified period is set not later than the end of the fiscal year in which the resolution on annual dividends payment was passed.

The dividends declared by the Company may be paid both in cash and by other property in case, if the Company's shareholders general meeting passes the resolution on dividends payment not in the form of money.

The rights of a shareholder – owner of ordinary shares for participation in shareholders general meeting with the right of vote on all the issues of its competence:

A shareholder – owner of ordinary shares has the right in accordance with Federal law "On joint stock companies" and the issuer's charter to participate in shareholders general meeting with the right of vote on all the issues of its competence.

The rights of a shareholder for getting a part of property of the issuer in case of its liquidation:

A shareholder – owner of ordinary shares has the right in accordance with the issuer's charter to get a part of the Company's property left after its liquidation proportionally to the number of shares at his/her disposal.

14.11.2003

The rights granted by shares to their owners:

The rights of a shareholder for getting the declared dividends:

The owners of A type preferred shares have the right for getting annual fixed dividend excluding the cases stipulated by the Charter.

Total amount paid as a dividend on each A type preferred share is fixed in the amount of 10% of the Company's net profit based on the results of the last fiscal year divided by the number of shares which make up 25% of the Company's charter capital. If the sum of dividends paid by the Company on each ordinary share in the specified year exceeds the amount due to payment as dividends on each A type preferred share, then the size of dividends paid on the latter should be increased to the size of dividends paid on ordinary shares.

Dividends on preferred shares may be paid at the expense of the Company's funds specially designated for this.

The resolution on the payment of annual dividends, the size of annual dividend and the form of its payment on the shares of each category (type) is passed by shareholders general meeting.

Dividends on A type preferred shares are paid during the time period set by the resolution of shareholders general meeting on the payment of the Company's annual dividends. The specified time period is set not later than the end of the fiscal year in which the resolution on payment of annual dividends was passed.

Dividends declared by the Company may be paid both in cash and by other property in case, if the Company's general meeting of shareholders passed the resolution on payment of dividends not in money form.

The rights of a shareholder – owner of preferred shares for participation in shareholders general meeting with the right of vote on the issues of its competence in cases, procedure and on conditions set in accordance with legislation on joint stock companies:

The owners of A type preferred shares have the right to participate in shareholders general meeting with the right of vote while solving the issues on the Company's reorganization and liquidation, and also on the issue of introducing amendments and modifications to the Company's Charter, in case when these amendments and modifications are limiting the rights of the said shareholders.

The owners of A type preferred shares have the right to participate in shareholders general meeting with the right of vote on all the issues of the agenda in case, when the shareholders meeting irrespective of the reasons did not pass the resolution on payment of dividends or the resolution was passed on non-complete payment of dividends on A type preferred shares.

This right arises for the owners of A type preferred shares since the meeting following annual meeting of shareholders at which the resolution on payment of dividends was not passed, and stops since the moment of the first payment of dividends on the specified shares in the full size.

The rights of a shareholder – owner of preferred shares of specific type for their conversion into ordinary shares or preferred shares of other types and the procedure of carrying out such conversion:

The issuer's charter does not stipulate the possibility of such conversion

The rights of a shareholder for getting a part of the issuer's property in case of its liquidation:

A shareholder – owner of A type preferred shares has the right in accordance with the issuer's charter to get a part of the Company's property left after its liquidation proportionally to the number of shares at his/her disposal.

Other data on shares provided by the issuer at its own discretion:

9 000 pieces of A type preferred shares – the quantity of paid off securities due to the issuer's reorganization

Additional issues of the issuer's preferred registered paperless shares were consolidated on **14.11.2003**. The date of state registration of the first issue of the consolidated ones – 30.09.1996 (№ 32 – 1 – 1375).

Full brand name: Joint Stock commercial bank "Moscow Delovoy Mir" (Open joint stock company)

Abbreviated brand name: MDM-Bank

Location: 115035, Moscow, Sadovnicheskaya str., 3

Mail address: 115035, Moscow, Sadovnicheskaya str., 3

The Issuer may appoint additional paying agents and cancel such appointments. Official

notification of the Issuer on the said actions is published by the Issuer during the period not later than 10 (Ten) business days following such appointments or their cancellation in "Vedomosty" newspaper.

If the Bonds repayment date falls on a day-off, irrespective if it is a state holiday or a day-off for settlement operations, then the due sum is paid on the first business day following the day-off. The Bond's Owner has no right to demand interest charging or any other compensation for such a delay in the payment.

The Bonds are repaid at the face value.

The Bonds are repaid in Russian Federation currency by non-cash method in favor of the Bonds owners.

It is presumed that nominal holders – National Depository Center (NDC) depositors are authorized to receive the repayment sums on the Bonds. NDC depositor and/or other entity not authorized by its clients to receive the repayment sums on the Bonds, not later than on the 3-rd (Third) business day prior to the established date of the Bonds repayment, provides to NDC the list of Bonds owners, this list should contain all the requisites, specified below in the List of owners and/or nominal holders of the Bonds.

The Bonds repayment is made in favor of the Bonds owners being such as of the end of the NDC operation day, preceding the sixth day prior to the date of the Bonds repayment (hereinafter – "The date of making up the list of owners and/or nominal holders of the Bonds").

Fulfillment of obligation with respect to the owner, included into the list of owners and/or nominal holders of the Bonds, is recognized to be proper including the case when the Bonds are alienated after the Date of making up the list of owners and/or nominal holders of the Bonds. Not later than on the 2-nd (Second) business day prior to the date of the Bonds repayment, NDC provides the Issuer and/or Paying agent with the list of owners and/or nominal holders of the Bonds, made up as of the Date of making up the list of owners and/or nominal holders of the Bonds, the list includes the following data:

a) Full name of the entity (person), authorized to receive the repayment sums on the Bonds.

In case the Bonds are transferred by the owner to a nominal holder and the nominal holder is authorized to receive the repayment sums on the Bonds, the full name of the nominal holder is indicated.

In case the Bonds have not been transferred to a nominal holder and/or a nominal holder is not authorized to receive the repayment sums on the Bonds, full name of the Bonds owner is indicated (the owner's surname, name, patronymic – for a natural person);

b) The number of Bonds, tallied at the owner's custody account or at interdepository account of the nominal holder of the Bonds, authorized to receive the repayment sums on the Bonds;

c) the location and the mail address of the entity (person), authorized to receive the repayment sums on the Bonds;

d) requisites of the bank account of the entity (person), authorized to receive the repayment sums on the Bonds, and namely:

- account number;

- the bank's name, where the account is established;

- the bank's correspondent account, where the account is established;

- bank's identification code of the bank, where the account is established;

e) taxpayer identification number of the entity (person), authorized to receive the repayment sums on the Bonds;

f) tax status of the entity (person), authorized to receive the repayment sums on the Bonds (resident, non-resident with permanent representation office in Russian Federation, non-resident without permanent representation office in Russian Federation, etc.).

The Bonds Owners, their authorized entities (persons), including NDC depositors independently keep track of completeness and actuality of requisites of bank's account, provided by them to NDC. In case of non-providing or untimely providing to NDC of the said requisites, the performance of such obligations is carried out to an entity (a person) who made a claim to meet

the obligations and who is the owner of the Bonds as of the date of making the claim. The Issuer meets the obligations under the Bonds on the basis of NDC data.

Not later than on the 2-nd (Second) business day till the date of the Bonds repayment, the Issuer transfers the required money resources to the account of the Paying agent.

Basing on the list of owners and/or nominal holders of the Bonds, provided by NDC, the Paying agent calculates the sums of money resources due to payment to each person, indicated in the list of owners and /or nominal holders of the Bonds.

On the date of the Bonds repayment, the Paying agent transfers the required money resources to the accounts of entities (persons) authorized to receive the repayment sums on the Bonds and indicated in the list of owners and/or nominal holders of the Bonds.

In case one entity (person) is authorized to receive the repayment sums on the Bonds from several owners of the Bonds, then this entity (person) is transferred the total sum without breakdown for each owner of the Bonds.

Prescheduled repayment is not stipulated.

The size of interest income (coupon yield) on the bonds, the procedure and conditions of its payment:

The Bond Owner has the right to receive a fixed interest of the Bond face value (coupon yield).

The date of coupon payment	Coupon №	Coupon rate
23.05.2003	1-st coupon	4,75%
22.08.2003	2-nd coupon	4,75%
21.11.2003	3-rd coupon	16,50%
24.02.2004	4-th coupon	16,50%
24.05.2004	5-th coupon	15%
23.08.2004	6-th coupon	15%
22.11.2004	7-th coupon	15%
21.02.2005	8-th coupon	15%
23.05.2005	9-th coupon	15%
22.08.2005	10-th coupon	15%
21.11.2005	11-th coupon	13%
21.02.2006	12-th coupon	13%

The calculation of the payment sum for each coupon per one Bond is made by the following formula:

$$K_j = C_j * Nom * (T(j) - T(j-1)) / 365 / 100 \%$$

where

j - serial number of coupon period, j=1...12

K_j - the sum of coupon payment for each Bond

Nom - face value of one Bond

C_j - the size of the interest rate of the j-th coupon, in per cent annual

T(j-1) - the start date of the the j-th coupon period

T(j) - the end date of the j-th coupon period

The payment sum on the coupon is determined with the precision of one kopeck (rounding-up of the second figure after the comma is made in the following way: if the third figure is more or equal to

5, then the second figure is increased by 1, in case the third figure after the comma is less than 5, then the second figure after the comma is not changed).

If the payment date of coupon yield on any of the twelve coupons on the Bonds falls on a day-off, irrespective if it is a state holiday or a day-off for settlement operations, then the due sum is paid on the first business day following the day-off. The Bond's Owner has no right to demand interest charging or any other compensation for such a delay in the payment.

The Bonds are repaid in Russian Federation currency by non-cash method in favor of the Bonds owners. It is presumed that nominal holders – National Depository Center (NDC) depositors are authorized to receive the repayment sums on the Bonds. NDC depositor and/or other entity (person) not authorized by its clients to receive the repayment sums on the Bonds, not later than on the 3-rd (Third) business day prior to the established date of the Bonds repayment, provides to NDC the list of Bonds owners, this list should contain all the requisites.

The Bonds repayment is made in favor of the Bonds owners being such as of the end of the NDC operation day, preceding the 6 (Sixth) day prior to the date of the Bonds repayment (hereinafter – “The date of making up the list of owners and/or nominal holders of the Bonds”).

Fulfillment of obligation with respect to the owner, included into the list of owners and/or nominal holders of the Bonds, is recognized to be proper including the case when the Bonds are alienated after the date of making up the specified list.

Not later than on the 2-nd (Second) business day prior to the date of the Bonds repayment, NDC provides the Issuer and/or Paying agent with the list of owners and/or nominal holders of the Bonds, made up as of the Date of making up the list of owners and/or nominal holders of the Bonds for income payment.

The Bonds Owners, their authorized entities (persons), including NDC depositors independently keep track of completeness and actuality of requisites of bank's account, provided by them to NDC. In case of non-providing or untimely providing to NDC of the said requisites, the performance of such obligations is carried out to an entity (a person) who made a claim to meet the obligations and who is the owner of the Bonds on the date of making the claim. The Issuer meets the obligations under the Bonds on the basis of NDC data.

Not later than on the 2-nd (Second) business day prior to the date of coupon yield payment on the Bonds, the Issuer transfers the required money resources to the account of the Paying agent.

Basing on the list of owners and/or nominal holders of the Bonds, provided by NDC, the Paying agent calculates the sums of money resources due to payment to each person, indicated in the list of owners and/or nominal holders of the Bonds.

On the date of the Bonds coupon yield payment, the Paying agent transfers the required money resources to the accounts of entities (persons) authorized to receive the repayment sums on the Bonds and indicated in the list of owners and/or nominal holders of the Bonds.

In case one entity (person) is authorized to receive coupon yield sums on the Bonds from several owners of the Bonds, then this entity (person) is transferred the total sum without breakdown for each owner of the Bonds.

The list of owners and/or nominal holders of the Bonds, made up for the purposes of the Bonds repayment, is used for the purposes of the payment of yield on the twelfth coupon. The yield on the twelfth coupon is paid simultaneously with the Bonds repayment.

8.7. Data on legislative acts regulating the issues of import and export of capital which may affect the payment of dividends, interest and other payments to non-residents

The basic legislative act regulating the issues of import and export of capital is RF Law № 3615-1 of October 9, 1992 “On currency exchange regulation and foreign-exchange controls”.

A number of Federal laws ratify the agreement of avoidance of double taxation between Russian Federation and foreign countries. At present the policy of avoidance of double taxation is effective with over 50 countries.

When applying the provisions of international agreements of Russian Federation, a foreign organization should provide to a tax agent paying the income the confirmation of the fact that this foreign organization has a permanent location in the country with which Russian Federation has an international contract (agreement) regulating the issues of taxation, this confirmation should be verified by competent authority of appropriate foreign country. In case if this confirmation is executed in a foreign language, the tax agent is also provided the translation in Russian.

Upon providing by a foreign organization, having the right for receiving income, of the above said confirmation to the tax agent who pays the income prior to the date of the income payment in regard to which Russian Federation international agreement stipulates preferential tax treatment in Russian Federation, then this income is exempted from deduction of the tax at the source of payment or the tax is deducted at the source of payment at reduced rate.

The most important effective laws:

1. Federal law № 167-ФЗ of July 17, 1999 “On ratification of Agreement between RF Government and the Government of the Republic of Cyprus on avoidance of double taxation as regards the taxes for income and capital”.
2. Federal law №18-ФЗ of February 8, 1998 “On ratification of Convention between RF Government and the Government of French Republic on avoidance of double taxation and prevention of tax evasion and violation of the tax legislation as regards the taxes on income and property”.
3. Federal law № 65-ФЗ of March 19, 1997 “On ratification of Convention between RF Government and the Government of United Kingdom of Great Britain and Northern Ireland on avoidance of double taxation and prevention of tax evasion as regards the taxes on income and on increment value of property, and the Agreement between RF Government and the Government of United Kingdom of Great Britain and Northern Ireland of February 15, 1994 concluded in the form of exchange of notes on application of separate provisions of the Convention”.
4. Federal law № 38-ФЗ of February 26, 1997 “On ratification of the Agreement between RF and Swiss Confederation on avoidance of double taxation as regards the taxes on income and capital”.
5. Federal law № 42-ФЗ of February 26, 1997 “On ratification of the Agreement between RF Government and the Government of Canada on avoidance of double taxation and prevention of tax evasion as regards the taxes on income and property”.
6. Federal law № 158-ФЗ of December 18, 1996 “On ratification of the Agreement between RF and Federal Republic of Germany on avoidance of double taxation as regards the taxes on income and property”.
7. The Agreement between RF and the United States of America on avoidance of double taxation and prevention of tax evasion as regards the taxes on income and capital (Washington D.C., June 17, 1992).
8. Convention between the Government of the USSR and the Government of Japan on avoidance of double taxation as regards the income taxes (Tokyo, January 18, 1986).

8.8. Description of the procedure of taxation of incomes on placed and being placed issuing securities of the issuer

During 2004 the incomes were paid to legal entities and natural persons in the form of dividends.

The incomes were taxed in accordance with the norms established by chapters 23 and 25 of Russian Federation Tax Code:

- **The procedure of taxation of natural persons:**

Residents

In accordance with item 2 of article 214 of Russian Federation Tax Code OJSC “VolgaTelecom”, being the source of income of natural persons-residents, received in the form of dividends, calculated and deducted the amount of tax separately for each taxpayer applicably to each payment of the specified income at the rate stipulated by item 4 of article 224 of this Code in the procedure stipulated by article 275 of this Code.

In regard to income of share participation in the activity of organization, received in the form of dividends, item 4 of article 224 of RF Tax Code sets the tax rate for income of natural persons-residents in the amount of 6%. However, article 275 of RF Tax Code being referenced to by article 214 of the Code sets a special procedure of defining the tax base for the income paid in the form of dividends:

The amount of tax, due to deduction from the income of taxpayer (resident) – beneficiary of dividends, is calculated by the tax agent proceeding from the total amount of tax calculated in the procedure established by this item and the share of each taxpayer in the total amount of dividends.

Total amount of tax is defined as the product of the tax rate established by sub-item 1 of item 3 of article 284 of this Code and the difference between the amount of dividends due to distribution between the shareholders (participants) in the current tax period, decreased by the amount of dividends due to payment by tax agent in accordance with item 3 of this article in the current tax period, and the amount of dividends received by the tax agent himself in current report (tax) period and previous report (tax) period, if these amounts of dividends did not participate earlier in the calculation while defining taxable income in the form of dividends.

On balance, to define the amount of tax on income paid to residents (to legal entities and natural persons) in the form of dividends, computed tax rate was calculated, for OJSC “VolgaTelecom” this rate amounted to **5,57%**. This rate is applied to deduct the tax from natural persons – residents.

The tax for income of natural persons in accordance with items 4, 6 of article 226 of RF Tax Code is deducted and transferred to budget on the day of actual payment of income.

Non-residents

In accordance with item 2 of article 214 of Russian Federation Tax Code OJSC “VolgaTelecom”, being the source of income of natural persons – non-residents, received in the form of dividends, calculated and deducted the amount of tax separately for each taxpayer applicably to each payment of the specified income at the rate stipulated by item 3 of article 224 of this Code – 30%.

The tax for income of natural persons in accordance with item 4, 6 of article 226 of RF Tax Code is deducted and transferred to budget on the day of actual payment of income.

- **The procedure of taxation of legal entities:**

Residents

In accordance with item 2 of article 275 of RF Tax Code OJSC “VolgaTelecom”, paying income in the form of dividends to legal entities-residents, is a tax agent and defines the amount of tax taking into account the peculiarities stipulated by this item of RF Tax Code:

The amount of tax due to deduction from the income of taxpayer (resident) - beneficiary of dividends is calculated by tax agent proceeding from the total amount of tax computed in the procedure established by this item and from the share of each taxpayer in the total amount of dividends.

The total amount of tax is defined as the product of tax rate, established by sub-item 1 of item 3 of article 284 of this Code (the rate of 6%), and the difference between the amount of dividends due to distribution between shareholders (participants) in current tax period decreased

by the amounts of dividends due to payment by tax agent in accordance with item 3 of this article in current report (tax) period and the amount of dividends received by the tax agent himself in current report (tax) period and previous report (tax) period, if these amounts of dividends did not participate earlier in the calculation while defining taxable income in the form of dividends.

On balance, to define the amount of tax on income paid to residents (to legal entities and natural persons) in the form of dividends, computed tax rate was calculated, for OJSC VolgaTelecom” this rate amounted to **5,57%**. This rate is applied to deduct the tax from legal entities – residents.

For separate beneficiaries of income in the form of dividends – Unit investments funds – the tax was not deducted, as Unit investments funds being separate property complexes **without establishing legal entity**, are not considered to be organizations for applying RF Tax Code, and hence they are not recognized to be taxpayers of the profit tax. This status is confirmed by item 7.2.7 of Methodical recommendations on application of chapter 25 of RF Tax Code approved by Russia’s Tax and Duties Ministry order № БГ-3-02/729 of 12.12.2002.

The tax for income in the form of dividends in accordance with item 4 of article 287 of RF Tax Code is deducted and transferred to budget within 10 days following the day of income payment.

Non-residents:

In accordance with item 3 of article 275 of RF Tax Code OJSC “VolgaTelecom”, paying income in the form of dividends to legal entities – non-residents, is a tax agent and defines the amount of tax proceeding from the paid amount taking into account the rate stipulated by sub-item 2 of item 3 of article 284 of RF Tax Code – 15%.

Reduced rates (5% and 10%) were applied to separate beneficiaries of dividends in accordance with item 1 of article 312 of RF Tax Code on the basis of non-residents’ providing the documents confirming their permanent stay in the country with which Russian Federation has an international treaty (agreement) regulating the issue of concessional mode of taxation.

The tax for income in the form of dividends in accordance with item 4 of article 287 of RF Tax Code is deducted and transferred to budget within 10 days following the day of income payment.

4. The Company's Board of directors

4.1. The Board of directors is a joint management body of the Company carrying out general management of its activity, excluding the solution of issues referred by federal laws and the Company's Charter to the competence of stockholders' general meeting and the Company's executive body.

4.2. The basic purposes of the activity of the Board of directors are the control over ensuring the efficient management of the company's activity in order to ensure long-term, stable development of the Company, the growth of its value, protection of rights and legitimate interests of the stockholders.

4.3. The major trends of the activity of the Board of directors are:

- ◆ Strategy formulation of the Company's development and control over its implementation;
- ◆ Control over the activity of the executive bodies;
- ◆ Ensuring the efficient activity of the system of internal control and risk management;
- ◆ Ensuring the protection of stockholders' rights and also contributory influence in the settlement of corporate conflicts.

4.4. In the course of preparing and adopting the decisions the Board of directors tends to take into account the interests of labor collective, partners, creditors, local public and other interested groups of the Company.

4.5. The purposes, principles of activity, competence, operating procedures of the Board of directors, the rights and duties of the members of the Board of directors are stated in the Charter and in the Company's internal document "Provision on the Board of directors of OJSC "VolgaTelecom".

4.6. In its decisions the Board of directors proceeds from the necessity to act right in relation to all the stockholders, and may not take into account the interests of only some single group of stockholders. The Board ensures the creation of the system of identifying and settlement of potential conflicts of interests both between its members and in the activity of the executive body.

4.7. The Board of directors ensures equal conditions to all the stockholders to exercise their rights.

4.8. The Company's Board of directors holds its sessions at least once a month in accordance with the approved action plan. The sessions of the Board of directors may be held in the form of joint attendance (including by using conference call) or in the form of absentee voting. The company tends to the fact that the decisions on the most important issues of its activity, such as the approval of the Company's budget, the strategies of development, assessment of work of executive bodies and determination of remuneration of its members, recommendation of the candidate of external auditor are adopted by holding the session of the Board of directors in the form of joint attendance.

**Changes and addenda to
The Provision on the Board of directors of
Open Joint Stock Company “VolgaTelecom”
(OJSC “VolgaTelecom”)
New wording**

Nizhny Novgorod city, 2004

- To state the first 4 paragraphs of item 6.5 of article 6 “Session of the Board of directors” in the following wording:

“The notice on convocation of a session of the Board of directors shall be sent out to

each member of the Board of directors together with necessary materials in time not less than 14 days prior to the session.

The specified period may be reduced in case of need of urgent solution of some issues provided that not a single member of the Board of directors objects to it.

If it is necessary to hold a session of the Board of directors within shorter deadlines according to the current legislation, the term of providing the notice and the necessary materials should be reduced”.

- To state item 7.3 of article 7 in the following wording: “Quarterly remuneration to each member of the Board of directors is established in the amount of 200 000 rubles.

For the Chairman of the Board of directors, the remuneration is established with a factor of 1,5.

The remuneration to a member of the Board of directors is reduced by:

30% - If he (she) participates in less than half of the sessions of the Board of directors held in the form of joint presence;

100% - If he (she) participates in less than half of all held sessions of the Board of directors.

Remuneration for the quarter in which there were re-elections of the Board of directors is paid to a member of the Board of directors as a proportion to the time of his (her) working time in this quarter”.

- To state item 7.4 of article 7 in the following wording: “The annual remuneration for all the members of the Board of directors of the Company is established as the sum of deductions in accordance with the rates (percentage):

- of the Company’s EBITDA as per the data of the accounting statement in accordance with International Accounting Standards for the report year;

- of the amount of the Company’s net profit based on the results of the report year allocated for dividends’ payment.

The annual remuneration is distributed between all the members of the Board of directors in equal shares.

The annual remuneration of a member of the Board of directors is reduced by 50% in case of his (her) participation in less than half of all the sessions of the Board of directors held during his (her) term of powers”.

- To state item 7.5 of article 7 in the following wording: “Rates (percentage) of deductions for calculation of annual remuneration are defined by a resolution of the general meeting of shareholders electing this structure of the Board of directors”.

- To consider item 7.6. of article 7 to be item 7.8.

- Article 7 is to be supplemented with item 7.6 of the following content: “The annual remuneration to a member of the Board of directors is paid not later than 3 months after the expiry of the term of powers of this structure of the Board of directors”.

- To add item 7.7. to article 7 of the following content: “The members of the Board of directors being the members of a committee of the Company’s Board of directors are paid the increment to quarterly remuneration related to the their performance of functions of members of a committee of the Board of directors in the amount of 40 000 rubles (for participation in each committee), however a member of the Board of directors may not be a member of more than 2 committees of the Board of directors.

For the chairman of a committee of the Board of directors this increment is established with a factor of 1,25”.

Independent Auditors' report

To the Shareholders and the Board of Directors of OJSC "VolgaTelecom"

1. We have audited the accompanying consolidated balance sheet of OJSC "VolgaTelecom" (a Russian open joint-stock company- hereinafter "the Company"), as of December 31, 2003, and the related consolidated statements of operations, cash flows and changes in shareholders' equity for the year then ended. These financial statements are in the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.
2. Except as discussed in paragraphs 3 and 5, we conducted our audit in accordance with International Standards on Auditing issued by the International Federation of Accountants. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.
3. As described in Note 12 "Investments in subsidiaries", the Company accounted for the purchase of certain subsidiaries based on historical cost of their net assets. The Company did not identify and estimate the fair value of the purchased net assets as required by IAS 22, "Business combinations". We were not able to quantify the adjustments, if any, required to reflect these acquisitions at fair value in the accompanying financial statements.
4. As described in Note 26 "Pension Plans and Employee Benefits", the Company has not determined and presented its obligations existing under defined benefits plans in accordance with IAS 19, "Employee Benefits". We were not able to quantify the adjustments, if any, to the financial statements. This matter caused us to qualify our audit opinion on the consolidated financial statements for the year ended December 31, 2002.

5. As described in Note 10 “Property, Plant and Equipment”, the Company’s accounting records relating to fixed assets are not designed to support their presentation in accordance with IAS 16, «Property, Plant and Equipment”, IAS 29, “Financial reporting in Hyperinflationary Economies” and IAS 36, “Impairment of Assets”. As such, certain estimates were made by management to present fixed assets in the accompanying financial statements. Owing to the nature of the Company’s records, we were unable to satisfy ourselves as to the adjustments, if any, which might have been determined to be necessary had additional evidence been available to better analyze the assumptions and estimates made by management. This matter caused us to qualify our audit opinion on the consolidated financial statements for the year ended December 31, 2002.
6. As the result of the matters described in paragraphs 3, 4 and 5, adjustments, if any, could materially affect the following items: (i) property, plant and equipment, equipment contributions, intangible assets and good will, assets and liabilities under defined benefit plans, deferred income taxes, minority interest and retained earnings and other reserves as of December 31, 2003 and the related amounts of depreciation and amortization expense, wages, salaries, other benefits and payroll taxes, income tax expense, minority interest and net income for the year ended December 31, 2003, (ii) the related disclosures and (iii) the corresponding amounts for 2002.
7. In our opinion, except for the effects on the financial statements of such adjustments, if any, which might have been determined to be necessary for the matters referred to in paragraphs 3, 3, and 5, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of OJSC “VolgaTelecom” as of December 31, 2003 and the results of its operation and its cash flows for the year then ended in conformity with International Financial Reporting Standards.
8. Without further qualifying our opinion, we draw attention to Note 1 “General Information” to the consolidated financial statements which discloses that the current liabilities of OJSC “VolgaTelecom” exceeded its current assets by 2 935 235 thousand rubles as of December 31, 2003. Management plans in regard to this matter are also described in Note 1.
9. As described in Note 1, the Company was the subject of a reorganization that was approved by the shareholders on November 9, 2001. The Company has accounted for the merger based on the principles of uniting of interests as described in IAS 22, “Business combinations”. In applying this method, the Company has reflected amounts in the financial statements as if the entities had been combined from January 1, 2002, the earliest period presented.

1. General information (continued)

2002 Reorganization (continued)

The merger was completed and effective on November 30, 2002. Transaction costs related to the merger of 68, 088 were expensed in 2002.

While International Financing Reporting Standards do not specify accounting principles to be applied to transactions among entities under common control, the Company has accounted for the merger based on the principles of uniting of interests as described in IAS 22, “Business Combinations”. In applying this method, the Company has reflected amounts in the financial statements at their historical carrying amounts as if the entities had been combined from January 1, 2002, the earliest period presented. Unless otherwise described, all information presented in these financial statements gives retroactive effective to the reorganization.

Liquidity and Financial Resources

As of December 31, 2003, The Company’s current liabilities exceeded its current assets by 2 935 235 (2002 – 1 694 376). As a result, significant uncertainties exist as to Company’s liquidity position and future capital resources.

Primarily due to ongoing investments in maintenance and construction programs (construction of multi-service telecommunication network and expansion of existing fiber- optic networks), the Company requires cash flows from operations, debt and other long-term financing resources, including hard currency borrowings for which no commercially viable hedging instruments are available.

To date, the Company has significantly relied upon short-term and long-term financing to fund the improvement of its telecommunication network. This financing has historically been provided through bank loans, vendor financing and leasing.

If needed, management believes that certain projects may be deferred or curtailed in order to fund the Company’s current operating needs.

Through 2004, the Company anticipates funding from a) cash generated from operations b) sale of investments (see Note 30 “Subsequent events”), and c) other financing from domestic and international lending institutions. Management also expects to continue to be able to delay payment for certain operating costs to manage its working capital requirements if necessary.

The accompanying financial statements have been presented on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. Accordingly, the financial statements do not include any adjustments related to the recoverability and classification of recorded asset amounts or any other adjustments that might result should the Company either be unable to continue as a going concern or if the Company was to dispose of assets outside the normal course of its operating plan and had problems with regard to timely settlement of its short-term liabilities and short-term portion of long-term liabilities when they became due.

2. Summary of Significant Accounting Policies

Basis of preparation

The Company maintains its accounting records and prepares its statutory accounting reports in Russian Rubles and in accordance with the Regulations on Accounting and Reporting in the Russian Federation. The accompanying consolidated financial statements presented in accordance with International Financing Reporting Standards (IFRS) are based upon the statutory accounting records that are maintained in accordance with the Russian accounting regulations under the historical cost convention. These statutory accounting records have been adjusted and re classified to present the accompanying consolidated financial statements in accordance with IFRS. IFRS primarily includes standards and interpretations approved by the International Accounting Standards Board (IASB), International Accounting Standards Committee (IASC) and Standing Interpretations Committee (SIC).

Management estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Prior Period Adjustments and Reclassifications

Management of the Company chose to restate opening retained earnings and the results for the year ended December 31, 2002 for previously unrecorded adjustments. These adjustments relate to accrual of interconnection costs (these amounts had previously been reflected in the period invoiced), accrual of dividends due to the holders of preferred shares (the dividends had been previously reflected in the reporting period when formally declared) as well as deferred tax effects of temporary differences not previously recognized on fixed assets. The effect of these adjustments on previously reported amounts is as follows:

Certain amounts in the prior period consolidated financial statements have been reclassified to conform with the current year presentation.

Basis of Consolidation

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries drawn up to December 31, 2003.

The Company has accounted for the reorganization (see Note 1 “General Information”) based on the principles of uniting of interests as described in IAS 22 “Business Combinations”

2. Summary of Significant Accounting Policies (continued)

Basis of Consolidation

Subsidiaries are consolidated from the date on which control is transferred to the Company and cease to be consolidated from the date on which control is transferred from the Company. Minority interests reflect the interests in subsidiaries not held by the Company (see Note 12 “Investments in Subsidiaries”).

Subsidiaries

A subsidiary is an entity that is controlled by the Company, directly or indirectly, generally through ownership of more than 50% of the voting share capital of the entity. These consolidated financial statements include the assets and liabilities, and revenues and expenses of the Company and of subsidiary undertakings, on line-by-line basis.

Where subsidiaries are not controlled throughout the year, consolidated results include the results of those entities for that part of the year during which control existed, except where the Company has applied the uniting of interests method in accordance with IAS 22 “Business Combination”. Under the uniting of interests method, the financial statement items of the combining entities for the period in which the combination occurs are included in the consolidated financial statements as if they had been combined from the beginning of the first period presented.

Where the purchase method is applied to account for the acquisition of subsidiaries, identifiable assets and liabilities of subsidiaries are stated at their fair value as of the acquisition date. Minority interest at the date of acquisition is determined in proportion to minority shareholders’ share in the fair value of the assets and liabilities of the subsidiary at that date. The share of minority shareholders is estimated on the basis of the common voting shares and preferred shares owned by shareholders that do not exercise control over the subsidiary.

Balances and transactions between the Company and subsidiary, as well as any income from intercompany transactions are eliminated. Income (loss) from intercompany transactions is identified and eliminated only in cases where the assets transferred under relevant transactions have not been sold to third parties (i.e. non-Company entities) and are carried in the balance sheet of a Company entity as of the balance sheet date.

Associates

An associate is an entity in which the Company has significant influence, which is usually demonstrated by the Company owning between 20% and 50% of the voting share capital.

Under the equity method, the investments in associates are carried in the balance sheet at cost plus post-acquisition changes in the Company’s share of net assets of the associates, less any impairment in value. The income statement reflects the Company’s share of the results of operations of the associates.

Unrealized gains and losses arising from transactions with associates are eliminated in proportion to the Company’s interest in the associates by adjusting the book value of investments.

Goodwill

For investments in subsidiaries and associates, any excess of the cost of acquisition over the Company’s share in the fair value of net identifiable assets and liabilities of the acquired entity is recognized as good will. Goodwill is amortized on a straight-line basis over its useful life, which according to management’s expectations is approximately 5 years. It is reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable. Goodwill is stated at cost less accumulated amortization and any impairment in value.

Goodwill on acquisition of associates is included in the carrying amount of investments in associates.

Upon disposal of investments in a subsidiary or an associate the remaining balance of unamortized goodwill is taken to gains or losses from such disposal.

Negative goodwill

Negative goodwill is the excess of the Company’s share in the fair value of net identifiable assets and liabilities of a subsidiary or an associate at the date of acquisition over the purchase price paid.

Negative goodwill is allocated to income on the basis of a review of the circumstances giving rise to it, as follows:

- to the extent that negative goodwill is included in future losses or expenses projected at the date of acquisition it is charged to income in the period when such losses or expenses arise;
- to the extent that negative goodwill is included in acquired amortized assets it is recognized as income on a straight-line basis over the remaining weighted average useful life of such amortized assets; and
- negative goodwill amount in excess of the fair value of all acquired non-monetary assets is directly recognized as income.

Negative goodwill arising from acquisition of an associate is charged to the carrying amount of investments in this associate.

Negative goodwill arising from acquisition of a subsidiary is recognized in the balance sheet as a reduction of assets.

Accounting for the Effects of Inflation

In 2000- 2002 the Russian Federation met the definition of a hyperinflationary economy, as defined by International Accounting Standard 29 “Financial Reporting in Hyperinflationary Economies” (IAS 29). The inflation rate based on the Russian consumer price index (“CPI”), as calculated by the State committee on Statistics (Goscomstat), was 15,1 % for 2002 (18,6 % and 20,2% for 20001 and 2002 respectively). Although the cumulative inflation index for the three-year period ended in 2002 was less than 100%, it was considered that the remaining criteria set forth by IAS 29 indicated that the Russian Federation continued to experience conditions that meet the definition of a hyperinflationary economy during 2002.

IAS 29 requires that financial statements prepared in the currency of a hyperinflationary economy be stated in terms of measuring unit current at the balance sheet date. In applying IAS 29, the Company used conversion factors derived from the Russian CPI.

The indices used to adjust amounts in these consolidated financial statements with respect to 2002 prices (2002 = 1,0) for the years ended December 31, and the respective conversion factors, are:

Year	Index	Conversion factor
1992	7 541	362,4
1993	67 846	40,3
1994	211 612	12,9
1995	487 575	5,6
1996	594 110	4,6
1997	659 403	4,1
1998	1 216 401	2,2
1999	1 663 091	1,6
2000	1 997 843	1,4
2001	2 374 037	1,2
2002	2 733 087	1,0

2. Summary of Significant Accounting Policies (continued)

Accounting for the Effects of Inflation (continued)

The main guidelines followed in adjusting the consolidated financial statements as of December 31, 2002 to current purchasing power at December 31, 2002 are:

- all amounts are stated in terms of the measuring unit current at December 31, 2002;
- monetary assets and liabilities are not restated as they are already expressed in terms of the monetary unit current at December 31, 2002;
- non- monetary assets and liabilities which are not carried at amounts current at December 31, 2002 and shareholders’ equity are restated by applying the relevant conversion factors;
- indexation adjustments to property, plant and equipment applicable to prior periods are credited to “Retained earnings and other reserves” in the accompanying balance sheet;
- all items in the consolidated statements of income and of cash flows are adjusted by applying appropriate conversion factors with the exception of depreciation, amortization and losses from disposal of fixed assets and other assets;
- the effect of inflation on the Company’s net monetary position is included in the consolidated statement of operations as a monetary gain.

Effective from January 1, 2003, international accounting and financial reporting bodies have determined that the Russian Federation no longer meets the criteria of IAS 29 for hyperinflation. Beginning 2003, the Company ceased applying IAS 29 and only recognizes the cumulative impact of inflation indexing through December 31, 2002, or non- monetary elements of the financial statements. Transactions undertaken subsequent to December 31, 2002 are reported at actual, nominal amounts except for those involving non- monetary assets and liabilities acquired prior to January 1, 2003. Results of operations (including gains and losses on disposal) involving such assets and liabilities are recognized based on the “restated cost”, which was calculated by applying through December 31, 2002 the relevant conversion factors to the carrying values of these assets and liabilities.

Foreign currency translation

Monetary assets and liabilities denominated in foreign currency are translated into Rubles at official central bank of the Russian Federation (CBR) exchange rates at the year- end. Transactions denominated in foreign currencies are reported at the CBR rates of exchange at the date of the transaction. Any gains or losses on assets and liabilities denominated in foreign currencies arising from a change in official exchange rates after the date of transaction are recognized as currency translation gains or losses.

Transactions that are conducted in Rubles when the related assets and liabilities are denominated in foreign currencies (or conventional units) are recorded in the Company's consolidated financial statements on the same principles as transactions denominated in foreign currencies.

2. Summary of Significant Accounting Policies (continued)

Property, Plant and Equipment

Property, plant and equipment are stated at cost less accumulated depreciation and any impairment in value.

Property, plant and equipment are depreciated on a straight-line basis over the estimated useful lives of each group of asset as follows:

Buildings	45
Constructions	20
Switches	15
Switches	10
Computers	5
Transport	5
Other	3

For the purpose of disclosure, Property, Plan and Equipment are aggregated into the following groups:

- Buildings and constructions;
- Switches and transmission devices;
- Machines and other, in which computers, vehicles and other items are included.

The period of validity of the Company’s operating licenses is significantly shorter than the useful lives used for depreciation of the cost of property, plant and equipment. Management believes that the operating licenses will be renewed without significant cost, which would allow the Company to realize the cost of its property, plant and equipment through normal operations.

Construction in progress is recorded as the total of actual expenses incurred by the Company from the beginning of construction to the reporting date, adjusted for the effect of inflation (for periods prior to January 1, 2003) from the date when such expenses occur to the reporting date in accordance with IAS 29. Accrual of depreciation begins when fixed assets are put into operation.

Borrowing costs that are attributable to the acquisition or construction of fixed assets are capitalized as part of the cost of the related asset when it is probable that they will result in future economic benefits to the Company and the costs can be measured reliably. Capitalization of borrowing costs commences with the beginning of activities to prepare the asset for intended use and lasts until the assets are ready for their intended use.

The carrying values of property, plant and equipment are reviewed for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. If any such indication exists and where the carrying values exceed the estimated recoverable amount, the assets or cash-generating units are written down to their recoverable amount. The recoverable amount of property, plant and equipment is the greater of net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash – generating unit to which the asset belongs. Impairment losses are recognized in the statement of operations.

2. Summary of Significant Accounting Policies (continued)

Property, Plant and Equipment (continued)

The cost of maintenance, repairs, and replacement of minor items of property is charged to maintenance expense. Renewals and betterments are capitalized. Upon the sale or retirement of property, plant and equipment, the cost and related accumulated depreciation are eliminated from the accounts. Any resulting gains or losses are included in the determination of net income.

Equipment contributions and government grants

Equipment transferred to the Company free of charge by its customers and other entities outside the privatization process is capitalized at market value at the date of transfer, and a corresponding deferred income is recognized as a liability in the balance sheet and credited to the statement of operations on the same basis as the equipment is depreciated.

Equipment contributions that do not generate any future income for the Company are not recognized.

Grants received from municipal authorities for the purchase of property, plant and equipment are reflected in the balance sheet as deferred income and recognized as income during the useful life of the respective asset in accordance with IAS 20 “Accounting for Government grants and Disclosure of Government Aid Information”.

When the grant relates to an income item it is recognized as income over the periods necessary to match the grant on a systematic basis to the cost that it is intended to compensate.

Intangible assets

Intangible assets acquired separately from the business are capitalized at cost. Intangible assets acquired as part of an acquisition of a business are capitalized separately from goodwill if the fair value can be measured reliably, subject to the constraint that, unless the asset has a readily ascertainable market value, the fair value is limited to an amount that does not create or increase any negative goodwill arising on the acquisition. Intangible assets created within the business are not capitalized and expenditure is charged against profits in the year in which it is incurred.

The carrying values of intangible assets are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable.

Research and Development Costs

Research and development costs are expensed as incurred.

Investments

Financial investments include the following three categories: held – to – maturity investments, investments available – for-sale and investments held for trading.

2. Summary of Significant Accounting Policies (continued)

Investments (continued)

All investments are initially recognized at cost, being the fair value of the consideration given and including acquisition charges associated with the investment.

After initial recognition, investments that are classified as held for trading are measured at their fair value. Gains or losses on trading securities are recognized in the income statement and included into income (loss) from financial investments.

Investments that are intended to be held to maturity, that have fixed maturity, being initially recorded at cost, are subsequently measured at amortized cost using the effective interest rate method. Amortized cost is calculated by taking into account any discount or premium on acquisition, over the period to maturity. For investments carried at amortized cost, gains and losses are recognized in income when the investments are derecognized or impaired, as well as through the amortization process. Those that do not have a fixed maturity are measured at cost.

After initial recognition, investments that are classified as available –for-sale are measured at their fair value. Gains or losses on available-for sale investments are recognized as a separate component of equity until the investment is sold, collected or otherwise disposed of, or until the investment is determined to be impaired, at which time the cumulative gain or loss previously reported in equity is included in income.

Other Financial Assets

Other Financial Assets consist of Long-Term Accounts receivable, Long-term Loans Granted to personnel and other financial assets. They are accounted at amortized cost using the effective interest rate.

Inventories

Inventories, which are mainly comprised of cable, materials, spare parts for telecommunications equipment and goods for resale, are priced at the lower of cost or net realizable value. Cost is determined using the average cost method.

Transportation, insurance and other similar expenditures incurred to bring inventories to their existing condition and location are included into the cost of raw materials and goods for resale.

Accounts Receivable

Accounts receivable are stated at face value, less an allowance for doubtful accounts. An estimate of doubtful debts is made when collection of the full amount is no longer probable.

Cash and cash equivalents

Cash and cash equivalents represent cash on hand and in the Company's bank accounts, as well as cash deposits and short-term investments with original maturities of three months or less.

2. Summary of Significant Accounting Policies (continued)

Interest-Bearing Loans and Borrowings

All interest-bearing loans and borrowings are initially recognized at cost of consideration received. After initial recognition, interest-bearing loans and borrowings are subsequently measured at cost plus accrued interest calculated using the effective interest rate method.

Non-Interest-Bearing Loans and Borrowing

The initial recognition of non interest-bearing loans and borrowings and equipment received for non- interest-bearing loans and borrowings are made at their fair market value estimated by discounting future payments to their present value. Market interest rates are approximated by using the prevailing rates of return for the Company's financial instruments having substantially the same terms and characteristics. The subsequent measurement of interest-bearing

loans and borrowings are carried at amortized cost using the effective interest rate method.

Notes to Consolidated Financial Statements (continued)
(in thousands, except share and per share amounts)

Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of past event, settlement of the obligation may require an outflow of resources embodying economic benefits and reliable estimate can be made of the amount of the obligation. Where the Company expects a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as an interest expense.

Pensions and other Post-Employment Benefits

State plans

Social contributions are made through a unified social tax (“UST”) calculated by the Company by the application of a regressive rate (from 35.6% to approximately 18%) to the annual gross remuneration of each employee. The Company allocates the UST to three social funds (state pension fund, social and medical insurance funds), where the rate of contributions to the pension fund vary from 28 % to 14% depending on the annual gross salary of each employee.

The Company’s contributions relating to the UST are expensed in the year to which they relate.

Other pension and pos –retirement benefits

Under collective bargaining agreements, the Company also provides post- employment retirement benefits by using defined contribution plans and defined benefit plans. The majority of the Company’s employees are eligible to participate under defined benefit plans based upon a number of factors, including years of service, age and compensation.

A defined contribution pan is a post-employment benefit plan under which the Company’s liability is limited solely to the amount of a contribution it agrees to pay into a fund. In this case all actuarial and investment risks will be borne by the employees. The Company recognizes contributions under a defined contribution plan in the period to which they are attributable.

2. Summary of Significant Accounting Policies (continued)

Pensions and other Post-Employment Benefits (continued)

Under defined benefit plans, the Company’s obligation is to provide the agreed benefits to current and former employees whereby actuarial and investment risks fall, in essence, on the Company.

Leases

Finance leases of equipment that transfer substantially all the risks and rewards incidental to ownership of the leased item to the Company are capitalized at the inception of the lease at the fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between the finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of

the liability. Finance charges are charged to interest expense.

Capitalized leased assets are depreciated using the straight– line method over the estimated economic useful life of the asset as for owned assets within the same class, with consideration of the contractual terms under which the assets can be used.

Leases where the lessor retains substantially all the risks and rewards of ownership of the asset are classified as operating leases. Operating lease payments are recognized as an expense in the statement of operations on a straight- line basis over the lease term.

2. Summary of Significant Accounting Policies (continued)

Revenue

Revenue is recognized to the extent that it is probable that economic benefits will flow to the Company and the revenue can be reliably measured.

The Company categorizes the revenue sources in twelve major categories:

1. Long-distance telephone services- domestic;
2. Long-distance telephone services - international;
3. Local telephone services ;
4. Installation and connection fees;
5. Documentary services;
6. Mobile telecommunication services;
7. Radio and TV broadcasting;
8. Data transfer and telematic services;
9. New services;
10. Rent of telephone channels;
11. Other telecommunications services;
12. Other revenues.

Long distance telephone services (domestic and international)

Revenues from subscribers for long distance services depend on the time of call, duration of call, destination of call, type of service used, subscriber category and the applied rate plan. The Company charges long-distance fees on a per-minute basis. The Company recognizes revenues related to the long distance services in the period when the services are rendered.

2. Summary of Significant Accounting Policies (continued)

Revenue (continued)

Revenue from long-distance services (domestic) includes also revenue from national telephone operators, which comprises two major groups.

The first group of revenues represents services rendered to OJSC “Rostelecom” for termination of long-distance traffic in the network of the Company.

In 2003 the Ministry of the Russian Federation for Antimonopoly Policy and Entrepreneurial Support (MAP) has conducted a reform of the settlements system of multi regional OJSC “Sviayzinvest” companies with OJSC “Rostelecom” for transit of intercity long-distance traffic. Till August 1, 2003 the revenue calculation had been based on the integral settlement rate, multiplied by the total number of minute- distances (transfer of 1 minute of traffic on 50 kilometer intervals of OJSC “Rostelecom” network) , transferred through the period.

The integral settlement rate has been calculated as the sum of the linear settlement rate between zones and difference between inbound and out bound termination settlement rates of the regional companies. The rate has been calculated and agreed by the MAP once per year according to traffic statistics of the previous year, thus it has not reflected real economical benefits and costs related to changes of the incoming and outgoing structure of the traffic in the current settlement period.

In August 2003 a new and more transparent inter-operators settlement system for intercity traffic has been introduced. The new system separates (i) payments of regional operators for the transfer of intercity traffic in OJSC “Rostelecom’s” network and termination of the traffic in the zone, where outgoing intercity calls of its own subscriber reaches its destination, and (ii) payments for the termination of the incoming intercity traffic from other operators in the network of the Company.

Calculation of the costs for the transit of intercity traffic is based on the new settlement rate that is equal to the sum of linear settlement rate multiplied by the quantity of 50 kilometer intervals between zones, using the termination settlement rate for the zone where the calls are terminated. Revenue calculation for the transit of intercity traffic from the OJSC “Rostelecom” to the customers of the regional telecommunication companies is based on the termination settlement rates. New rates have been defined by the order of the MAP dated July 4, 2003.

The second group of revenues from national operators represents services rendered to interconnected telecom operators that transfer the traffic of their customers via the Company’s network

Major revenues are recognized from the services for transit of the traffic and interconnection to the network (one time fees). The Company recognizes revenues from national operators in the period when the services are rendered.

Revenue (continued)

Local telephone services

Revenue from the local telephone services depends on the duration of the telephone connections and subscription fee, while time driven billing scheme is applied. If fixed payment scheme is applied then revenue depends on the subscription fee only. The Company recognizes revenues related to monthly network fees for local services in the month the service is provided to the subscriber.

Installation and connection fees

The company recognizes installation and connecting fees for indefinite contracts with its subscribers as revenues when the installation and connection are complete.

Documentary services

Revenues from telegraph services comprise fees for telegram transmissions and other wire line data transmission services. The Company recognizes revenues related to telegraph services in the period when the services are rendered.

Mobile telecommunication services

Major revenues from cellular services arise from airtime services including local, intercity long distance and international long-distance calls, subscription fees, value –added services, outbound and inbound roaming. The Company recognizes the revenues related to mobile telecommunications services in the period when the services are rendered.

Radio and TV broadcasting

The Company maintains a wireline radio broadcasting network. The revenues comprise monthly fees from subscribers and installation fees for wireline radio sets. The Company recognizes the revenues related to radio broadcasting in the period when the services are rendered.

Data transfer and telematic services

The Company recognizes revenues related to data transfer and telematic services in the period when the services are rendered.

New services

Major revenues from new services include internet services, ISDN, IP- telephony, intelligent network services. The Company recognizes revenues related to new services in the period when the services are rendered.

Rent of telephone channels

Major revenues are recognized from the following services: rent of intercity and international, digital, analogue and telegraph channels. The Company recognizes revenues from the rent of channels in the period when the services are rendered.

2. Summary of Significant Accounting Policies (continued)

Revenue (continued)

Other telecommunication services

Other telecommunication services primarily consist of revenues received by public switched telephone network (PTSN) stations from the rent of direct lines and local interconnection. The Company recognizes revenues related to other services in the period when the services are rendered.

Other revenues

Other revenues primarily consist of revenues received from manufacturing of the telecommunication equipment and its technical support, transportation services, recreation services and sale of products and services provided by auxiliary units.

Income Tax

Deferred income tax assets and liabilities are calculated in respect of temporary differences in accordance with IAS 12 “Income Taxes” (later IAS 12).

IAS 12 requires the use of a balance sheet liability method for financial reporting and accounting for deferred income taxes. Deferred income taxes are provided for all temporary differences arising between the tax bases of assets and liabilities and their carrying values. The Company’s principal temporary differences arise in respect of property, plant and equipment. A deferred tax asset is recorded only to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilized.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized.

Deferred tax assets and liabilities are measured at tax rates that are expected to apply to the period when the asset is realized or the liability is settled based on tax rates that have been enacted or substantively enacted at the balance sheet date.

A deferred tax liability is recognized for all taxable temporary differences associated with investments in subsidiaries, associates, and interests in joint ventures, except to the extent that both of the following conditions are satisfied: the Company is able to control the timing of the reversal of the temporary difference; and it is probable that the temporary difference will not reverse in the foreseeable future.

Value-Added Tax

Value-added tax related to sales are payable to the tax authorities on an accrual basis based upon invoices issued to the subscriber. VAT incurred for purchases and paid to suppliers may be reclaimed, subject to certain restrictions, against VAT related to sales. VAT that is not currently reclaimable as of the balance sheet date is recognized in the balance sheet on a gross basis.

11. Intangible Assets and Goodwill (continued)

In accordance with the Board decision of OJSC "Sviayzinvest", the Company's parent, dated April 14, 2003 the Company was instructed to proceed with the purchase and implementation of an enterprise management system (ERP) based on Oracle E-business Suite software. The Company's Board of Directors confirmed this decision on May 28, 2003 and approved a supply contract with CJSC "Otkrytye tekhnologii 98" in the amount of 21,915 thousand US dollars excluding VAT (approximately 665,450).

In accordance with the supply contract, the Company has been provided with non-exclusive licenses for 13,029 users of E-business Suite among other license applications.

The Company will commence amortization of these costs upon substantial completion of implementation. Prior to this time management will periodically assess this intangible asset for impairment. The Company expects to complete this system implementation in 2007.

Licenses and software are amortized on a straight-line basis over their estimated useful lives determined equal to the term of the license or the license agreement for software. Useful lives of other intangible assets are 5-10 years.

22. Loans and Borrowings (continued)

Vendor financing

Alkatel

In 2001-2003 the Company entered into several agreements with Alkatel under which Alkatel delivered and installed telecommunication equipment. The related liability is denominated in Euro and US dollar. Part of these loans bears interest at 4-6 % per annum. The amount of non-interest bearing loans as at December 31, 2003 represents the present value of future payments under the agreements. Interest is accrued at a weighted average interest rate on the Company's interest bearing borrowings obtained in appropriate periods and denominated in Euro, which is approximately 6.8 % per annum.

IskraTel

The Company entered into agreements with IskraTel in the total amount of 2,651 thousand US dollar. The agreement is non-interest bearing. The liability as of December 31, 2003 is the present value of the future payments discounted at 5% per annum.

Huawei

The Company entered into agreements with Huawei in the total amount of 3,099 thousand US dollar. The agreement is non-interest bearing. The agreements do not provide for interest payments thus the amount of liability as at December 31, 2003 represents the present value of future payments. Interest is accrued at a weighted average interest rate on the Company's interest bearing borrowings obtained in appropriate periods (approximately 6.5%).

Promissory Notes

Vneshtorgbank

The Company's short-term borrowings from Vneshtorgbank are represented by Promissory Notes issued in the amount of 400,000, which mature in 2004. Interest is accrued at 13% per annum.

Long-term Loans

Bank Loans

Sberbank

Long-term loans from Sberbank mostly represent ruble credit lines under several agreements entered into during 2003 by the Company. The agreements terminate in 2005-2006. The loans under the agreements accrue interest at 14 % per annum. As of December 31, 2003, the outstanding amount was 707,677. The loans are collateralized with fixed assets valued at 748,537.

22. Loans and Borrowings (continued)

International Moscow bank

Long-term borrowings from International Moscow Bank primarily represent a loan in the amount of 300,000 received in July 2003. The agreement terminates in January 2005. The loan under the agreement accrues interest payable at 12% per annum. As of December 31, 2003, the outstanding amount was 300,000. The loan is collateralized with fixed assets valued at 360,664.

Sviayzinvest

In 1997-1998 Sviayzinvest granted loans to the Company in the amount of 11,850 US dollars. The loans were provided for the working capital requirements and development of the rural telephone networks and was required to be settled in 2000. Following the crisis of 1998 and significant increase in the exchange rate of the US dollar to the ruble, re-payments on this agreement were ceased. As of December 31, 2003 the loans were fully repaid.

Bonds

In February 2003, the Company registered the issue of interest-bearing bearer's bonds, series VT-1, par value of 1 thousand Rubles. The bonds have 12 coupons. Payments against the first coupon are made on the 91st day from the date of issue; interest per other coupons are payable every subsequent 91st day. The coupon interest rate for the 1st and 2nd coupons is determined at 4.75 % per annum, for the 3rd and 4th coupons at 16.5% per annum, for the 5th -10th at 15% per annum, for the 11th and 12th at 13% per annum. The bonds mature 1,096 days from the date of issue in February 2006. The bonded loan is carried at the amortized cost with an effective rate of 13.67% per annum.

Vendor financing

Vnesheconombank

In 1995-1996, the Ministry of Finance of the Russian Federation (hereinafter, "the Ministry") provided long-term financing to the Company to purchase telecommunications equipment from various foreign vendors. Vnesheconombank acted as the Company's lending agent on behalf of the Ministry. Agreements are denominated in Euro. The interest under these agreements is accrued at floating rate Plafond C, which in 2003 approximated 5.75-6.50 %, plus 2 % per annum. The loan is not collateralized.

22. Loans and Borrowings (continued)

Alkatel

The Company's long-term liabilities to Alcatel Sel AG are mainly represented by the amounts payable for the telecommunication equipment under contracts in 1997-2002. The amounts payable under these agreements are denominated in Euro and are repayable in equal semi-annual or quarterly installments till 2005. These agreements bear an interest rate of 4-6%. Certain Euro denominated loans are interest-free. The amount of this liability as at December 31, 2003 represents the present value of future payments under the agreements. Interest-free loans were discounted at the average interest rate on similar interest-bearing borrowings denominated in Euro. Equipment received under these agreements is pledged to the supplier until the final payment is made.

Ericsson Nikola Tesla

In 2001 the Company entered into several agreements with Ericsson Nikola Tesla in the total amount of 2,650 thousand US dollar, under which Ericsson Nikola Tesla delivered telecommunication equipment to the Company. The loans under the agreements accrue interest at 8% per annum.

Siemens AG

In 1997-2001 the Company entered into several agreements with Siemens AG totaling to 5,460 thousand Euro, under which Siemens AG delivered telecommunication equipment to the Company. The amounts payable under these agreements are denominated in Euro. The loans under the agreements accrue interest at 6% per annum.

Mashpriborkom

In 1997 the Company entered into several agreements with Mashpriborkom totaling to 2,948 thousand Euro, under which it delivered telecommunication equipment to the Company. The loan under the agreement accrues interest at 11% per annum

23. Finance Lease Obligations

The Company has finance lease contracts for telecommunication equipment. Future minimum lease payments under finance lease contracts together with the present value of the net minimum lease payments as of December 31, 2003 and 2002 are as follows:

26. Pension Plans and Employee Benefits

In 2003 the Company made various payments to employees in addition to salary. These payments generally represent financial aid to the Company's employees with limited abilities and bonuses to employees, which had made no breaches of internal policies during the last fiscal year. Such benefits were included in salary, benefits, salary taxes and other social expenditures in the accompanying consolidated statements of operations for the year ended December 31, 2003 and totaled 74,454 (2002 - 121,000).

26. Pension Plans and Employee Benefits (continued)

In addition to statutory pension benefits, the Company also contributes to defined benefit plans which cover most of its employees. Non-government pension fund "Telecom-Soyuz", which is related to the Company (see Note 28 "Related Parties"), maintains the plan. The plans provide for payment of retirement benefits starting from statutory retirement age, which is currently 55 for women and 60 for men. The benefits are based on a formula recognizing minimal statutory pension, length of service both in the Company and in the telecommunications industry, as well as final average earnings and position in the Company at retirement. The benefits are not vesting and are subject to the employee retiring from the Company on or after the above-mentioned ages. The Company makes contributions to the pensions funds as a set percentage of the employees' salaries or in the amount set forth in the agreement with the pension fund subject to a specific pension arrangement.

The Company has not made an actuarial determination of its obligation under these agreements and hence has not recorded its obligations or made disclosures required under IAS 19, "Employee Benefits", pertaining to the value of obligations and assets of the plan as of December 31, 2003 and 2002.

27. Commitments and Contingencies

General Contingencies

The Russian economy while deemed to be of market status beginning in 2002 continues to display certain traits consistent with that of a market in transition. These characteristics have in the past included higher than normal historic inflation, lack of liquidity in the capital markets, and the existence of currency controls, which cause the national currency to be illiquid outside of Russia. The continued success and stability of the Russian economy will be significantly impacted by the government's continued actions with regard to supervisory, legal, and economic reforms.

Management cannot predict what effect changes in fiscal, political or tariffing policies may have on the Company's current financial position or its ability to make future investments in property, plant and equipment. The consolidated financial statements do not include any adjustments that might result from these uncertainties. Related effects will be reported in the financial statements as they become known and estimable.

27. Commitments and Contingencies (continued)

Tax Laws and Regulations

Legislation and regulations regarding taxation and foreign currency transactions in Russia continue to evolve as the government manages the transformation from a command to a market-oriented economy.

During 2002, the Russian Federation enacted a new tax code with significant modifications from the prior law.

The various legislation and regulations are not always clearly written and their interpretation is subject to the opinions of the local, regional and national tax authorities, the Central Bank and Ministry of Finance. Instances of inconsistent opinions are not unusual.

The current regime of penalties and interest related to reported and discovered violations of Russia's laws, decrees and related regulations is severe. Interest (at the Central Bank of RF official rates) and fines are levied when an understatement of tax liability is discovered. As a result, penalties and interest can result in amounts that are multiples of any unreported taxes.

The Company believes that it has paid or accrued all taxes that are applicable. Where practice concerning the provision of taxes was unclear, the Company has accrued tax liabilities based on management's best estimate. The Company's policy is to accrue for contingencies in the accounting period in which a loss is deemed probable and the amount is reasonably determinable. No such accruals have been made as of December 31, 2003.

Because of the uncertainties associated with the Russian tax and legal systems, the ultimate amount of taxes, penalties and interest assessed, if any, may be in excess of the amount expensed to date and accrued as of December 31, 2003.

Insurance Coverage

The Russian insurance industry is in a developing state and many forms of insurance protection common in other parts of the world are not yet generally available. During 2003, the Company did not maintain insurance coverage on a significant part of its property, plant and equipment asset bases, business interruption, or third party liability in respect of property or environmental damage arising from accidents on the Company's property or relating to the Company's operations. Until the Company obtains adequate insurance coverage, there is a risk that the loss or destruction of certain assets could have a material adverse effect on the Company's operations and financial position. As of December 31, 2003, the Company's insured fixed assets at gross book value amounted to approximately 10.6 billion rubles.

27. Commitments and Contingencies (continued)

Litigation, Claims and Assessments

The Russian legal system is characterized by (1) inconsistencies between and among laws, Presidential decrees, and Russian governmental, ministerial and local orders, decisions, and resolutions and other acts; (2) conflicting local, regional and federal rules and regulations; (3) the lack of judicial and administrative guidance on interpreting legislation; (4) the relative inexperience of judges and courts in interpreting legislation; and (5) a high degree of discretion on the part of governmental authorities.

Management is unable to estimate what developments may occur in respect of the Russian legal system or the resulting effect of any such developments on the Company's financial condition or future results of operations. The financial statements do not include any adjustment that may result from these uncertainties.

Telecommunication Reforms

On January 1, 2004, a new law on telecommunications came into effect in Russia. The law sets the legal basis for the telecommunications business in Russia and defines the status that state bodies have in the telecommunications sector. The new law may increase the degree of regulators' oversight over the Company's operations and until such time as appropriate regulations consistent with the new law are promulgated, there will be a period of confusion and ambiguity as regulators interpret the legislation.

Under the new law the Company is obliged to provide services under similar circumstances and equal conditions for connecting telecommunications networks and for carrying traffic from communications operators rendering similar services and to render connection services and the services involved in carrying traffic to these operators under the same terms and of the same standard, like for its own structural subdivisions and for affiliated parties.

According to the new telecommunication law, the individual subscriber has an option for local service to be paid based on subscription or by-the-minute payment system.

Management cannot predict with any certainty to what degree (if at all) the new law will affect the Company's operations.

Capital Commitments

Oracle E-business Suite implementation

The Company contracted to invest approximately 5,360 thousand US dollars into installation of Oracle E-business Suite in 2004.

Guarantees issued

As of December 31, 2003 the Company had issued guarantees totaling 1,236,657 (December 31, 2002 - 631,000) with regard to bank loans mainly drawn by OJSC "RTC-Leasing" (see also Note 23 "Finance Lease Obligations"). On October 23, 2002 the Company issued a guarantee for a loan received by OJSC "RTC-Leasing" from Sberbank under a non-revolving credit line facility. Guarantee outstanding as of December 31, 2003 amounted to 437,926. On September 9, 2003 the Company issued another guarantee for a loan received by OJSC "RTC-Leasing" from Sberbank in the amount of 790,681. Both guaranteed loans were received by OJSC "RTC-Leasing" to finance expenditures related to lease agreements with the Company. The repayment of these loans should be performed in equal installments during 2004 - 2008. As of December 31, 2003 Sberbank did not claim any overdue repayments of the loans. The Company's management does not expect occurrence of any material obligations related to these guarantees.

Capital Investments

At December 31, 2003 the Company has commitments of 378,571 (2002 - 380,828) for capital investments into modernization and expansion of its network, including finance lease obligations in the amount of 202,297 (2002 - 225,273)

28. Related Parties

OJSC "Sviayzinvest"

The Company regards OJSC "Sviayzinvest" as its parent entity. OJSC "Sviayzinvest" was wholly owned by the Russian Government until July 1997 when the Government sold 25% plus one share of the Charter Capital of OJSC "Sviayzinvest" to the private sector.

An effectively operating telecommunications and data transmission facility is of great importance to Russia for various reasons including economic, strategic and national security considerations. Consequently, the Government has and may be expected to continue to exercise significant influence over the operations of OJSC "Sviayzinvest" and its subsidiary companies.

28. Related Parties (continued)

The Government's influence is not confined to its share holdings in OJSC "Sviayzinvest". It has general authority to regulate tariffs and does regulate domestic long distance tariffs to a limited extent. In addition, the Ministry of Information Technologies and Communications of the Russian Federation (the former Ministry of Communications and Informatization of the Russian Federation) has control over the licensing of providers of telecommunications services.

During 2003 the Company repaid two loans to OJSC "Sviayzinvest" in the amount of 62,526 (see also Note 22 "Loans and Borrowings").

OJSC "Rostelecom"

OJSC "Rostelecom", a majority owned subsidiary of OJSC "Sviayzinvest", is the primary provider of domestic long distance and international telecommunications services in the Russian Federation. The annual expense associated with traffic carried by OJSC "Rostelecom" and terminated outside of the Company's network is stated as interconnection charges (see also Note 2 "Summary of Significant Accounting Policies"). Further, OJSC "Rostelecom" uses the Company's network to provide incoming long-distance and international traffic to its subscribers and partner operators. Transactions undertaken by the Company with OJSC "Rostelecom" reported in the accompanying consolidated financial statements as at December 31, 2003 and 2002 and for the years then ended were as follows:

	<u>2003</u>	<u>2002</u>
Expenses on traffic transfer and rent of channels from Rostelecom	1 450 821	1 019 177
Revenue received from Rostelecom	380 513	9 976
Accounts payable to Rostelecom as at the year-end	199 897	174 803

OJSC "RTC-Leasing"

OJSC "RTC-Leasing" purchases telecommunication equipment from domestic and foreign suppliers and leases the equipment. In October 2003, OJSC "Rostelecom", which owned 27% of ordinary shares of OJSC "RTC-Leasing" and exercised financial and operational control over the company's activities, sold all its shares of OJSC "RTC-Leasing" to a third party.

Transactions with Government Organizations

Government organizations are a significant element in the Company's customer base, purchasing services both directly through numerous authorities and indirectly through their affiliates. Certain entities financed by the Government budget are users of the Company's network. These entities are generally charged lower tariffs as approved by the Ministry of Antimonopoly Policies and Entrepreneurship Support than those charged to other customers. In addition, the Government may by law require the Company to provide certain services to the Government in connection with national security and the detection of crime.

Government subscribers accounted for approximately 39.6% of gross trade accounts receivable as of December 31, 2003 (2002 - 31.9%). Amounts outstanding from government subscribers, including receivables for allowances for subscribers with reduced tariffs, as of December 31, 2003, amounted to 744,802 (2002 - 320,116).

Constitutional Court Resolution

In 2004, Resolution No. 169-O of the Constitutional Court of the Russian Federation dated April 8, 2004 has become publicly available. The resolution has the possible effect of deferring the timing in which companies are able to offset input VAT to the extent the creation of such VAT is deemed to be attributable to the utilization of borrowed funds. In the event local taxing authorities would assert and successfully defend such an interpretation, the result could have a material adverse impact on the Company's financial condition. As of the date of this report, management is unable to predict the outcome of this uncertainty.

Decrease of VAT rate

Commencing from January 1, 2004, the VAT rate was decreased from 20% to 18%.
